

# DOH-1100

## Heavy-Duty Domed Outdoor Housing

DOH-1100 is a heavy-duty outdoor housing that protects your LevelOne network camera from harsh weather conditions.

**Durable:** Heavy duty aluminium dome for outdoor and indoor installation

**2-layer dome design:** Helps keep the camera cool in hot weather by creating a pocket of air that adds extra insulation.

**Temperature control:** An automatic sensor regulates the dome's temperature, making sure extreme weather conditions do not affect camera viewing or operation. The built-in fan turns on when it is hot, the built-in heater turns on when it is cold. (See temperature information below.)

**New coating:** Fluorocarbon paint resists salt water, as well as other acids and bases.

**Easy to install:** Perfect match with LevelOne FCS-1010, FCS-1040 and FCS-1060, simple internal mounting bracket.
