

## Device Server

## Thermal Printer

DSA-1000

PRT-1000

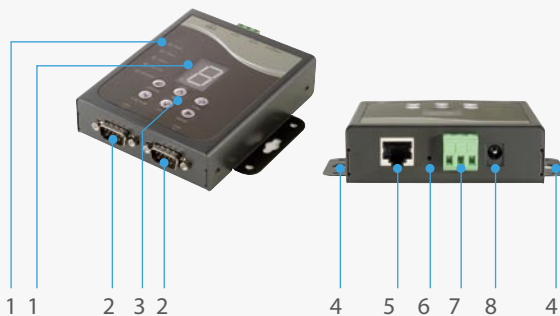

### H/W Version: 1

The LevelOne DSA-1000 Device Server and PRT-1000 Printer are additional accessories specifically designed for using with the LevelOne WHG-1000 Wireless Hotspot Gateway. They are designed for the small Hotspot service provider that needs to print out important information for their clients, such as Logon Username and Password, SSID, security method and Encryption Key.

As Internet usage continues to become more mobile, customers have an increasing expectation for wireless Internet access in public locations, such as in coffee shops, restaurants, hotel lobbies, convention centers or airport terminals.

The LevelOne WHG-1000 is a multi-functional, manageable, all-in-one hotspot solution designed to make it easy and affordable for businesses of small to medium sizes, including coffee shops, Internet cafes, hotel lobbies and exhibition areas to provide secure, password-protected Internet access to customers either as a value-added service or to generate additional revenue. The hotspot on-demand billing kit is designed with ease of use for account generation via DSA-1000 Network Device Server from the built-in On-Demand billing plan in WHG-1000 Wireless Hotspot Gateway and then prints an account ticket via the PRT-1000 Thermal Printer.

### DSA-1000

### PRT-1000

1. LED Indicators
2. Serial Port
3. Optional Buttons
4. Wall Mountable Holes
5. RJ-45 Port
6. Reset Button
7. DC Socket
8. DC Power Jack
9. RJ-11 Port
10. Parallel Port
11. Power Jack
12. On/Off Button

### Key Features

- All-in-one hotspot ticket generator combo set
- Push-button for account generation and point-of-sale ticket printing
- Easy Installation and Configuration
- Account provisioning and flexible billing
- Clear and Legible Printing
- No Complicated Billing System Required
- Allows user account generation at the point of sale

### Works Well With

#### WHG-1000

300Mbps Wireless PoE Hotspot Gateway

### Technical Specification

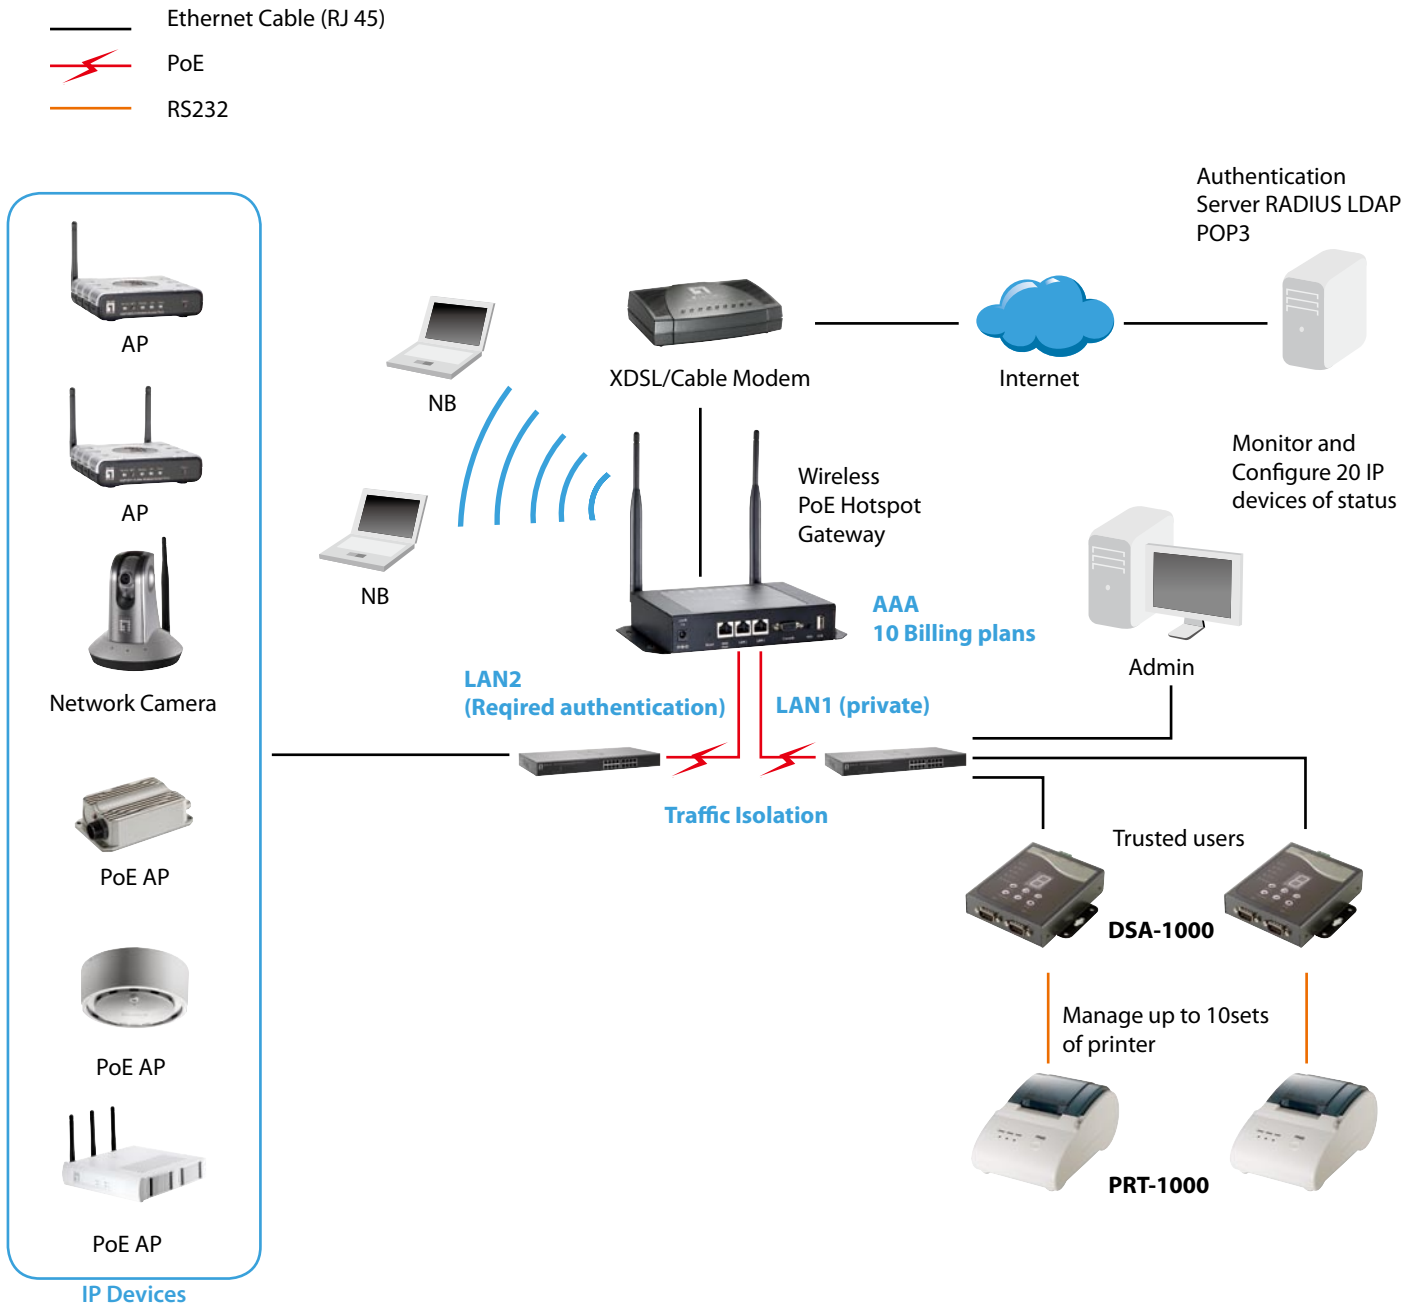

#### DSA-1000

Number of Ethernet Port: 1 x RJ-45
Speed: 10/100Mbps
Number of Serial Ports: 2
Serial Standards: RS-232 DB-9M
Baud rate: 9600bps
Configuration Option: Web Console
Weight: 300 g
Dimensions Without Mounting Kit: 90 x 123 x 27 mm
Dimensions With Mounting Kit: 116 x 123 x 27 mm
Input Voltage: 12 to 48 V DC
Power Consumption: 200mA @ 12 V, 106mA @24 V

#### PRT-1000

Print Method:Thermal Line Printing
Print Speed:52mm/sec
Print Density:384dots/lin or 8dots/mm
Paper Width:57.5±0.5mm
Interface:Serial(RS-232C)
Character:
(1)ASCII code:12*24dots
(2)Graphic font:24*24dots
Power Supply:+8VDC/3.5A
Operating Temperature:0~+50°C
Storage Temperature:-20~+60°C
Dimension:185mm(L)x114mm(W)x90mm(H)
Weight:900g
