

Mini Printer Server with One USB 2.0 Port

FPS-9022

H/W Version: 1

One USB 2.0 Port Printer Server

LevelOne FPS-9022 is a Mini-sized Ethernet print server which is designed to perform with any stand-alone USB printer resource to network users.

Supports Peer-to-Peer and Server-Based Printing

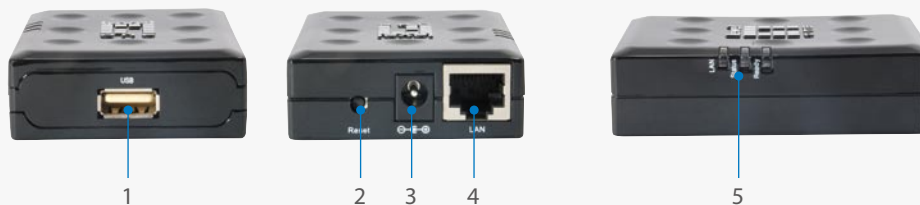

Our LevelOne FPS-9022 supports both Peer-to-Peer and Server-based printing. Peer-to-Peer printing, which allows LAN clients connect directly with the printer server to execute printing functions; and Server-based printing, which allows other customers send print material first to a server which then connects with the printer server to execute printing jobs.

Supports Complete Printing Methods and Major OS

The FPS-9022 printer server provides LPR, IPP, SMB/TCP, Raw Printing and Unix Logical Printer printing methods. Simply choose the best method according to your environment.

Fault-Tolerant Firmware Upgrades

Users need not worry about errors occurring in the middle of an upgrade thus preventing the printer server from operating. This unit's fault-tolerant upgrade function allows for re-upgrades should problems occur during the initial upgrade.

1. USB Port
2. Reset Button
3. Power Port
4. RJ-45 LAN Port
5. LED Indicators

Key Features

- Complies with IEEE 802.3, IEEE 802.3u Standards
- Provides one USB 2.0 printer port
- Supports Peer-to-Peer printing (TCP/IP/IPX/NetBEUI)
- Supports Server-based printing (Novell/Windows)
- Supports Fault-tolerant upgrade capability
- Supports Network Protocols: TCP/IP, IPX/SPX, NetBEUI and AppleTalk
- Supports Printing Protocols: LPR, IPP, SMB/TCP, Raw Printing and Unix Logical printing
- 98SE/ME/2000/XP, Netware (3.x above), Unix/Linux
