You have to know how to assemble the surge arrester

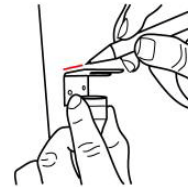

1

Before installing the antenna, make sure the purchased extension cable can reach the location of your wireless devices.

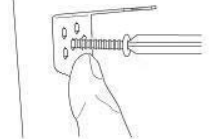

2

Take out the L-type metal bracket and mark the mount position on the wall.

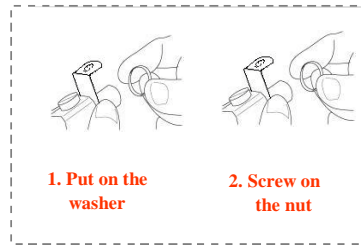

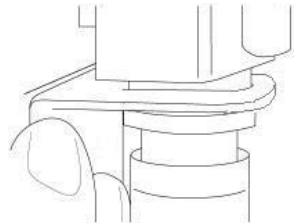

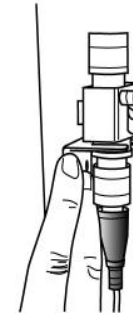

3

Screw it to the wall

4

Seat the arrester into bracket

1. Put on the washer

2. Screw on the nut

Weather-proof tape for outdoor installations

If your surge protector is installed outdoors, remember to wrap both connectors tightly with the enclosed water-proof tape after screwing on the cable connectors.
