

16-Port PS2 KVM Switch

Product Overview

The LevelOne KVM-1611 16-port PS2 KVM Switch controls multiple PCs from a single keyboard, mouse and VGA monitor station. The KVM-1611 PS2 KVM switch is loaded with features such as Hot-Key Control, and on-screen display menu, PC server name searching, push-button and auto-scan control.

One Station Controlling Multiple Locations

The LevelOne KVM-1611 PS2 KVM Switch can control up to sixteen different units connected. Up to eight KVM units can be connected through Daisy Chain to deploy a larger KVM controlled network.

Each unit can be selected either through the user-friendly On-screen Menu or by using the Hot Key pushbuttons located on the KVM-1611. Also, for easy management, PC's can be connected or disconnected without powering down any unit.

With the eight-character password control, connected PC's can be protected from unauthorized access. The KVM-1611 also features auto-PC server name search and an Auto-scan mode for monitoring PC's.

Multiple Platform Support

The KVM-1611 supports a variety of operating system platforms. It supports DOS, Win3.x, Win95/98/98SE/2000/ME/XP, WinNT, Netware, Unix and Linux.

KVM-1611

Key Features

- Manage 16 PC's from a single location
- Support a variety of operating system platforms
