# FSW-1641/2441TX F/W update procedure

(1) Copy the TFTP32 folder to the desktop of Windows and set this PC's IP in same subnet as FSW-1641/2441TX you would like to update.

(2) Copy the F/W Bin file to TFTP32 folder

(3) Execute tfptd32.exe then the PC will be a TFTP server

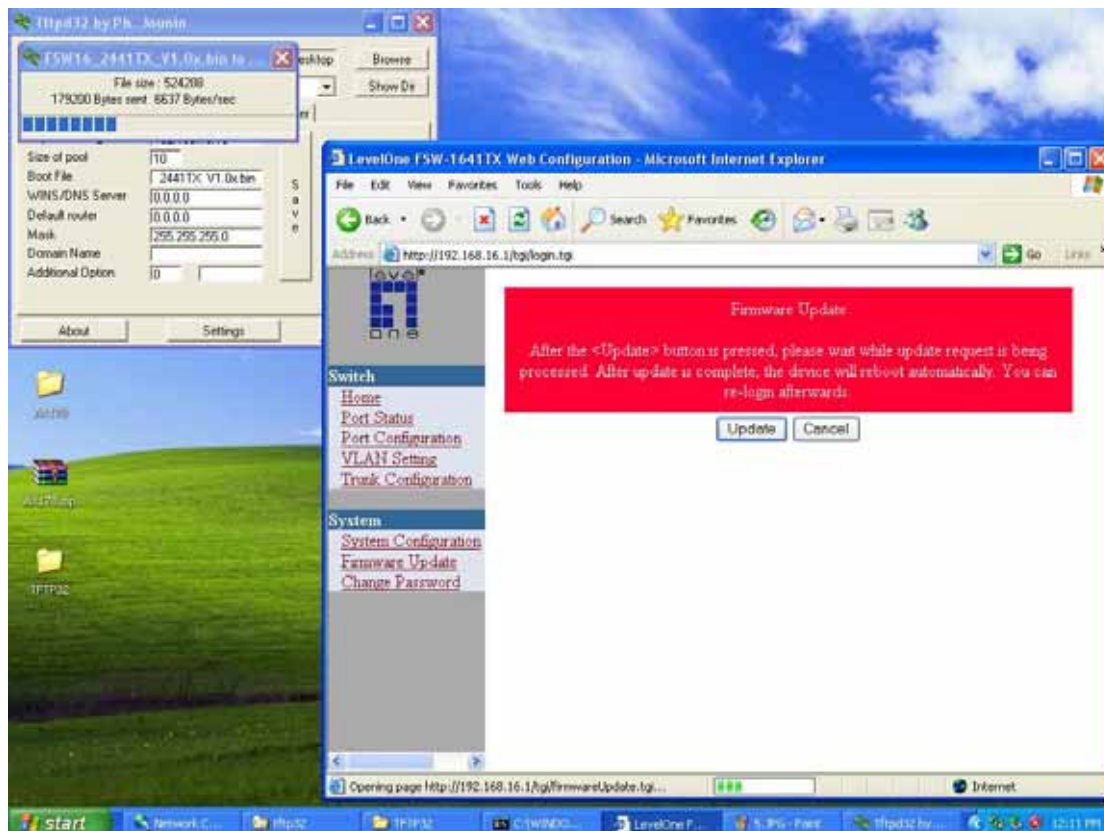

(4) Set TFTP DHCP server information:

    1. IP pool starting address→ any free same subnet IP as TFTP server

    2. Size of pool→ any

    3. Boot file→ full file name of the F/W Bin file

    4. Mask→ same as TFTP server

(5) Login to the web management of FCS-1641/2441TX then check the Firmware
Update page, click the "Update" button for F/W update.

(6) FCS-1641/2441TX 's F/W is being updating.

(7) Click the TFTP server tab to make sure F/W Bin file has been transmitted to FCS-1641/2441TX completely then press the reset button of the switch 1 minute later.

(8) New F/W is updated successfully.
