

# FNS-5000B

# Network Attached Storage 2-Bay SATA HDD w/ Gigabit Ethernet

**User Manual** 

Ver. 1.02 - 0804

#### FOREWORD

Thank you for choosing LevelOne products! This user manual provides detailed instructions of using FNS-5000B. Please read carefully and start to enjoy the powerful functions of FNS-5000B

#### LIMITED WARRANTY

In no event shall the liability of Digital Data Communications Co., Ltd. (LevelOne) exceed the price paid for the product from direct, indirect, special, incidental, or consequential software, or its documentation. LevelOne makes no warranty or representation, expressed, implied, or statutory, with respect to its products or the contents or use of this documentation and all accompanying software, and specifically disclaims its quality, performance, merchantability, or fitness for any particular purpose. LevelOne reserves the right to revise or update its products, software, or documentation without obligation to notify any individual or entity.

#### Caution

Back up your system periodically to avoid any potential data loss. LevelOne disclaims any responsibility of all sorts of data loss or recovery.

Should you return any components of FNS-5000B NAS package for refund or maintenance, make sure they are carefully packed for shipping. Any form of damages due to improper packaging will not be compensated.

#### Safety Warnings

- 1. FNS-5000B can operate normally in the temperature of 0°C-35°C and relative humidity of 0%-85%. Please make sure the environment is well-ventilated.
- 2. The power adapter/cord and devices connected to FNS-5000B must provide correct supply voltage (40W, 90-264V).
- 3. Do not place FNS-5000B in direct sunlight or near chemicals. Make sure the temperature and humidity of the environment are in optimized level.
- 4. Unplug the power cord and all connected cables before cleaning. Wipe FNS-5000B with wet towel. Do not use chemical or aerosol to clean FNS-5000B.
- 5. Do not place any objects on FNS-5000B for the server's normal operation and to avoid overheat.
- 6. Use the flat head screws in the product package to lock the hard disks in FNS-5000B when installing hard disks for proper operation.
- 7. Do not place FNS-5000B near any liquid.
- 8. Do not place FNS-5000B on any uneven surface to avoid falling off and damage.
- 9. Make sure the voltage is correct in your location when using FNS-5000B. If you are not sure, please contact the distributor or the local power supply company.
- 10. Do not attempt to repair your FNS-5000B in any occasions. Improper disassembly of the product may expose you to electric shock or other risks. For any enquiries, please contact the distributor.

## 1. Overview

### 1.1. Introduction

Thank you for choosing FNS-5000B NAS. This product has the following key features:

- ✓ Support two SATA HDD with embedded RAID function to enhance data security
- ✓ Enables P2P BitTorrent client to download files automatically
- Enrich your digital multimedia life and manage personal albums and multimedia files easily
- ✓ Built-in Web server, FTP server, File server and Printer server functionality
- ✓ Remote back provides remote disk backup to another storage device over IP network
- ✓ Intelligent one touch auto copy provides direct copy of data on USB devices

## 1.2. Package Contents

CD-ROM (User Manual, utility)

Ethernet cable x 1

Power cord

Flat head screws x 8

## 1.3. Hardware Illustration

## 2. Installation

## 2.1. Install Hard Disk

 Unfasten the four screws in the front of FNS-5000B and remove the front panel.

2. Loosen the screws on the disk trays and take out the disk trays.

3. Install a hard disk on each tray. Make sure the disk holes match the holes at the base of the disk tray and lock the disk with four screws.

 Insert the disk trays to FNS-5000B.
 Push the disk trays to the end. Fasten the screws on the trays. When two disks are installed, make sure HDD1 is installed on top of HDD2.

5. Cover FNS-5000B with the front panel and fasten the four screws.

## 2.2. Hard Disk Recommendation List

The following HDD models are verified by LevelOne that are compatible with FNS-5000B. It is recommended to use the disk models listed here. Other HDD brands that are not tested by LevelOne may or may not work properly with FNS-5000B. For more updated compatible hard disk information, please visit LevelOne website at www.level1.com.

LevelOne disclaims any responsibility for product damage/ malfunction or data loss/ recovery due to misuse or improper installation of hard disks in any occasions for any reasons.

## 2.3. Setting Up

Please check your network environment and select the appropriate installation method before installing FNS-5000B.

### 2.3.1. Office/ Home

Connect FNS-5000B and PC to the same hub/ switch/ router.

### 2.3.2. Individual

Connect FNS-5000B directly to your PC by a network cable.

When you have verified your network environment, please follow the steps below to install FNS-5000B.

- 1. Connect FNS-5000B to hub/ switch/ router or PC according your network environment.
- 2. Connect USB printer to FNS-5000B and enable USB printer service\*.
- 3. Connect the power.
- 4. Press the power button of FNS-5000B to turn on the server.

\* Optional step. You can skip this step if you are not using printer service.

## 2.4. LED / System Status

FNS-5000B provides LED indicators for you to indicate system status and information easily. When FNS-5000B is turned on, please check the following items to make sure system status is normal. Note that the following LED information is applicable only when you have properly installed HDD1 and/or HDD2, and connected FNS-5000B to the network and power.

- USB Status
   Status
   HDD1
   HDD2
- 5 LAN
- 6 Power

| LED                     | System starting up   | System has started |  |
|-------------------------|--|--------------------|--|
| OUSB                    | It shows when USB connected  |                    |  |

### 2.5. Configure Software Settings

After checking system status, please follow the steps below to configure software settings of FNS-5000B. The configuration procedure of Windows and Mac users are different. Please select the appropriate procedure according to your OS.

#### 2.5.1. Windows® Users

Insert FNS-5000B CD-ROM in your PC. Wait for a few seconds until the following screen shows up. Then start to configure the software settings of FNS-5000B.

1. Install Quick Install Wizard.

2. After installed, run Quick Install Wizard, the following screen will be shown. Select name on the list and click **Configure** 

| D Quick In  | nstall Wizard                       |  |  |                           | 3                   |
|---|-------------------------------------|--|--|---------------------------|---------------------|
| Name of serv  |                                     | ess of server  |  | vs workgroup<br>by server |                     |
| Name  |                                     | IP Address   | Workgroup  | Version                   | System version      |
| NASETP  | 700                                 | 192.168.50.2<br>192.168.50.170                         | DDCASIA  | 2.27                      |                     |

Enter the default user name and password.

| Default user name: administrator |  |
|----------------------------------|--|
| Password: admin                  |  |

| 🗊 Administrator Login          |                |
|--------------------------------|----------------|
| Administrator <u>N</u> ame     | Administrator  |
| Administrator <u>P</u> assword | *****          |
| <u>0</u> K                     | <u>C</u> ancel |

When you have entered quick configuration page, enter related information to complete the settings. Click **OK** to save changes.

**Note:** If you select to enter IP address manually, please make sure your PC and FNS-5000B are in the same LAN. If you are not sure about the network settings, please contact your network administrator or ISP.

**Note:** All files and directories on FNS-5000B will be created using Unicode encoding. If your FTP client or PC does not support Unicode, e.g. Windows<sup>®</sup> 95, 98SE, ME OS, select the language the same as the OS of your PC here in order to view the files and directories on the server properly.

FNS-5000B provides several default share folders for data sharing and access. To map the share folders on FNS-5000B as your drive, check the option "**Map drive**" and follow the steps below to proceed.

a. For example, to map the folder **Public** as your drive, select the folder and click **Map Network Drive**.

| Select Network Share                                     | × |
|--|---|
| Select network share to map as network drive :<br>Public |   |
| Qdownload<br>Qmultimedia<br>Qusb<br>Qweb                 |   |
| Map Network Drive Cancel                                 |   |

**Note:** The share folders Qdownload, Qmultimedia, Qusb, and Qweb are system default network share of FNS-5000B for the use of Download Station, Multimedia Station, USB auto-copy and Web Server.

b. Select the drive letter for the connection and click **Finish**.

| Map Network Drive |  |
|-------------------|--|
|                   | Windows can help you connect to a shared network folder<br>and assign a drive letter to the connection so that you can<br>access the folder using My Computer.<br>Specify the drive letter for the connection and the folder<br>that you want to connect to: |
|                   | Drive:       X:         Folder:       \\NA58857E7\Public         Example:       \\server\share         Reconnect at logon         Connect using a different user name.         Sign up for online storage or connect to a network server.                    |
|                   | < Back Finish Cancel   |

c. Upon successful connection, you can start to use the share folder on FNS-5000B. You can access these folders by opening My Computer.

4. When the administration page of FNS-5000B is shown, you can start to use the services. If you have any questions during web administration, please click the help button is on the top right hand corner of the page.

To modify system settings, click **Administration**. Enter the user name and password to login.

**Note:** It is recommended to use Internet Explorer 6.0 or above to access FNS-5000B. FNS-5000B supports Internet Explorer 6.0 or above only.

#### 2.5.2. Mac Users

FNS-5000B provides two methods for Mac users to connect to FNS-5000B. You can select <u>A.</u> <u>Connect FNS-5000B by Mac directly or B. Connect FNS-5000B by the network</u>.

#### A. Connect FNS-5000B by Mac directly

1. Please go to **Network** settings and select **Using DHCP**. Then connect FNS-5000B to your Mac via a cable.

|                 | Network                     |                  |
|-----------------|-----------------------------|------------------|
| L               | ocation: Automatic          | •                |
|                 | Show: Built-in Ethernet     | \$               |
| TCP/            | IP PPPoE AppleTalk Pro      | exies Ethernet   |
| Configure IPv4: | Using DHCP                  | ;                |
| IP Address:     | 169.254.0.1                 | Renew DHCP Lease |
| Subnet Mask:    | 255.255.0.0 DHCP C          | lient ID:        |
| Router:         |                             | (If required)    |
| DNS Servers:    |                             | (Optional)       |
| Search Domains: |                             | (Optional)       |
| IPv6 Address:   | fe80:0000:0000:0000:0211:24 | ff:fe87:221e     |
|                 | Configure IPv6              | (?)              |

2. Open a web browser and enter the default IP address of FNS-5000B to login the system.

|    | Default I | P of F | NS-5000B: http://169.254.100.100:8080 |               |
|----|-----------|--------|---------------------------------------|---------------|
| 00 | 00        |        |                                       | Apple - Start |
|    | > C       | +      | Shttp://169.254.100.100: 8080/        |               |

3. When the administration page is shown, click **Administration**. Enter the default user name and password to login.

 Follow the step-by-step guide in Quick Configuration to complete the settings of FNS-5000B. If you have any questions during web administration, please click the help button

On the top right hand corner of the page.

Default user name: administrator

#### B. Connect FNS-5000B by the network

1. Please go to **Network** settings to check and write down the subnet and router address of your Mac. Then select **Using DHCP**.

| 0              | Network                                      |            |
|----------------|--|------------|
|                | Location: Automatic  Show: Built-in Ethernet |            |
|                | TCP/IP PPPoE AppleTalk Proxies Ethernet      | ]          |
| Configure IP   | v4: Using DHCP                               |            |
| IP Addre       | ess: 192.168.0.2 Renew                       | DHCP Lease |
| Subnet Ma      | sk: 255.255.255.0 DHCP Client ID:            |            |

|                | Configure IPv6                               | ?          |
| Click the lock | to prevent further changes. Assist me)       | Apply N    |

0

**Note:** If you are not sure about the network settings, please contact your network administrator or ISP.

2. Connect FNS-5000B to your Mac by a cable. Open a web browser and enter the default IP address of FNS-5000B.

3. When the administration page is shown, click **Administration**. Enter the default user name and password to login.

Default user name: **administrator** Password: **admin** 

## **FNS-5000B**

4. Go to TCP/IP Configuration of Network Settings

. Select to use static IP and

input the IP address of FNS-5000B. Make sure the value does not conflict with the IP address of your Mac and other devices in LAN. Configure the subnet mask and default gateway of FNS-5000B to the same as subnet mask and router address of Mac which you set in Step 1. Click **Apply** to confirm.

## 3. Powerful Services

FNS-5000B provides the following powerful functions and applications.

#### A. Use network share-Public folder

- 1. You can access the public folder of FNS-5000B by the following means:
  - a. Open My Network Places and find the workgroup of FNS-5000B. If you cannot find the server, please browse the whole network to search for FNS-5000B. Double click the name of FNS-5000B for connection.
  - b. Use Run function in Windows<sup>®</sup>. Enter \\[FNS-5000B name]\* or \\[FNS-5000B IP]# to access share folder on FNS-5000B.

| Run   | ? 🛛  |
|-------|--|
| -     | Type the name of a program, folder, document, or<br>Internet resource, and Windows will open it for you. |
| Open: | \\NA58B57E7  |
|       | OK Cancel <u>B</u> rowse   |
|       |  |
| Run   | ? 🛛  |
| Run   | Type the name of a program, folder, document, or<br>Internet resource, and Windows will open it for you. |
| Run   |  |

- c. Windows<sup>®</sup> users can use Quick Install Wizard to find FNS-5000B. When the administration page is shown, click **Web File Manager**. Enter the user name and password, and then start to manage FNS-5000B.
- 2. You can upload files to the Public folder.

#### B. Manage FNS-5000B

- Manage FNS-5000B using web browser by Windows<sup>®</sup> or Mac
- 1. You can access FNS-5000B web administration page by the following methods:
  - a. Windows<sup>®</sup> users can use Quick Install Wizard to find FNS-5000B.
  - b. Windows<sup>®</sup> and Mac users can open a web browser and enter

#### http://[FNS-5000B IP]:8080#

\*The user name here should be the same as the server name you enter in Chapter 2.5 **Configure Software Settings**.

**#**The IP address here should be the same as the IP address you enter in Chapter 2.5 **Configure Software Settings**. If you are using DHCP: (a) connect the PC to FNS-5000B directly, please use the default IP address 169.254.100.100:8080 of FNS-5000B; (b) connect FNS-5000B by network, please run Quick Install Wizard to view the IP address of FNS-5000B.

2. When the administration page is shown, click Administration, Web File Manager, Web Server, Multimedia Station, or Download Station. Enter the user name and password, and then start to manage FNS-5000B. For further details, please refer to the user manual in FNS-5000B CD-ROM.

## FNS-5000B

#### C. Use FNS-5000B Services

#### Multimedia Station

FNS-5000B provides a user-friendly web management interface for you to manage personal albums easily. You can view images and multimedia files, or browse photos by thumbnails preview. Please refer to Chapter 5. Multimedia Station

#### Download Station

FNS-5000B supports P2P download mechanism. You can add download task to FNS-5000B and let the server finish downloading independently of your PC. Please refer to Chapter 6. Download Station

#### Mirror Station

Provides RAID 1 mirroring disk volume for data protection. Please refer to Chapter 3.5.1.

#### Disaster Recovery

FNS-5000B supports remote share folder backup via the network. In case of data damage in PC, you can restore all backup data. Please refer to Chapter 3.8.6.

#### Web Server

FNS-5000B enables you to upload html files and manage your own website easily. Please refer to Chapter 7. Web Server

#### Printer Server

FNS-5000B supports network printer sharing function by direct USB connection. No extra help from PC is needed. Please refer to Chapter 3.5.3.

#### FTP Server

FNS-5000B offers the simplest FTP server setup procedure for you to establish FTP server without any professional assistance. Please refer to Chapter 8. FTP Server

#### File Server

FNS-5000B provides convenient and secure file server functions that support central data management. Users can be granted with the right to access network share and share important files. Please refer to Chapter 3.7 and 9. Web File Manager

## 3.1. Server Administration

There are 8 main sections in server administration:

# 3.2. Quick Configuration

Please follow the step-by-step guide in Quick Configuration to complete the settings of FNS-5000B. If you have any questions during web administration, please click the help button (2) on the top right hand corner of the page. Other buttons are described as below:

- C: Return to previous page
- (): Return to home page
- E: Logout system

## 3.3. System Settings

Basic system settings include the server name, date, time, and view system settings.

|                           | 谷             | 4 | 2-0      | -;; | <u> 2</u> 2 |     | $\bowtie$ |  |
|---------------------------|---------------|---|----------|-----|-------------|-----|-----------|--|
| System Settings           |               |   |          |     |             |     |           |  |
| Server Name               | - Server Name |   |          |     |             |     |           |  |
| Date & Time               | Server Name:  |   | NAS8B57E | 7   |             |     |           |  |
| Filename Encoding Setting |               |   |          |     | _           |     |           |  |
| View System Settings      |               |   |          |     |             | • / | \pply     |  |

#### 3.3.1. Server Name

Enter the name of FNS-5000B. The server name can be 14 characters long at maximum, which supports alphabets, numbers and hyphen (-). The server does not accept names with space, period (.), or names in pure number.

| - Server Name |           |   |   |       |
|---------------|-----------|---|---|-------|
| Server Name:  | NAS8B57E7 | ] |   |       |
|               |           |   | • | Apply |

## 3.3.2. Date & Time

Set the date, time, and time zone according to your location. If the settings are incorrect, the following problems may occur:

- ✓ When using a web browser to access or save a file, the display time of the action will be incorrect.
- ✓ The time of event log displayed will be inconsistent with the actual time when an action occurs.

| <ul> <li>Adjust the date, time and time zone (</li> </ul> | of this server  |
|---|---|
| Time Zone:  | (GMT) Greenwich Mean Time : Dublin, Edinburgh, Lisbon, London 💌 |
| Current date and time:                                    | 2006 / 5 / 18 AM 07 : 52 : 10                                   |
| Change date and time manua                                | dly   |
| Date  | January 🔽, (mm dd, yyyy)  |
| Time  |   |

| Time Interval   | 1 day(s) 🔛  |
|   |   |
|   |   |
|   | <ul> <li>Apply</li> </ul>                                       |

#### ✓ Synchronize with an Internet time server automatically

You can enable this option to update the date and time of the system automatically with specified NTP (Network Time Protocol) server. Enter the IP address or domain name of the NTP server, e.g. time.nist.gov, time.windows.com. Then enter the time interval for adjusting the time (minimum value is 1 minute and maximum value is 99 days).

| <b>V</b> | Synchronize with an Internet tim | e server automatically                             |            |              |        |
|----------|----------------------------------|--|------------|--------------|--------|
|          | Server:                          | pool.ntp.org                                       | Update now | (Status:)    |        |
|          | Time Interval                    | 1 day(s) 💌   |            |              |        |

## 3.3.3. Encoding Setting

Select the language FNS-5000B uses to display files and directories.

**Note:** All files and directories on FNS-5000B will be created using Unicode encoding. If your FTP clients or the OS of your PC does not support Unicode, e.g. Windows<sup>®</sup> 95/98/ME, select the language the same as your OS here in order to view the files and directories on the server properly.

| <ul> <li>Filename Encoding Setting</li> </ul> |   |   |       |
|---|---|---|-------|
| Filename Encoding:                            | Chinese-Traditional 🛛 💌                   | × |       |
|   | Chinese-Simplified<br>Chinese-Traditional | 7 |       |
|   | Cyrillic<br>English                       |   | Apply |

|                    |                    |   |    |
|                    |                    | + | OK |

## 3.4. Network Settings

You can configure network settings in this section and enable several powerful applications of FNS-5000B, e.g. Multimedia Station, Download Station, and Web Server.

## 3.4.1. TCP/ IP Configuration

You can select one of the following two methods to configure the TCP/IP settings

|                       | ☆ ≁ ฅ 🗧 🛯 🗆 🖂 🗗   |
|-----------------------|---|
| Network Settings      |   |
| TCP/IP Configuration  | – TCP/IP Configuration  |
| Microsoft Networking  |   |
| Apple Networking      | Obtain IP address settings automatically via DHCP   |
| Web File Manager      | O Use static IP address   |
| FTP Service           | Fixed IP Address 192 . 168 . 0 . 3  |
| Multimedia Station    | Subnet Mask 255 . 255 🔽 . 255 🔽 . 0 🔽   |
| Download Station      | Default Gateway 192 . 168 . 0 . 1   |
| Web Server            | Primary DNS Server 0.00.00  |
| View Network Settings | Secondary DNS Server D . D . D  |
|                       | Current connection status<br>Connection speed: 100 Mbps, MTU: 1500 Bytes<br>Jumbo Frame Setting (MTU)<br>- Jumbo frame will only work in Gigabit network environment. Please make sure your clients are<br>configured to use the same frame size.<br>- Jumbo frame setting will work only when all network appliances connected have enabled<br>jumbo frame and use the same MTU value.<br>Select Jumbo Frame setting: Disable Jumbo Frame, MTU value is 1500 bytes V |

#### 1. Obtain IP address settings automatically via DHCP

If your network supports DHCP, FNS-5000B will use DHCP protocol to retrieve the IP address and related information automatically.

#### 2. Use static IP address

To use fixed IP address for network connection, enter fixed IP address, subnet mask and default gateway.

**Primary DNS Server:** Enter the IP address of primary DNS server that provides DNS service for FNS-5000B in external network.

**Secondary DNS Server:** Enter the IP address of secondary DNS server that provides DNS service for FNS-5000B in external network.

#### Jumbo Frame Setting (MTU)

"Jumbo frames" refer to Ethernet frames that are larger than 1500 bytes. It is designed to enhance Ethernet networking throughput and reduce the CPU utilization of large file transfers by enabling more efficient larger payloads per packet.

Maximum Transmission Unit (MTU) refers to the size (in bytes) of the largest packet that a given layer of a communications protocol can transmit.

FNS-5000B uses standard Ethernet frames: **1500 bytes** by default. If your network appliances support jumbo frame setting, select the appropriate MTU value for your network environment. FNS-5000B supports 4074 and 7418 bytes for MTU.

Note: Jumbo frame setting is valid in Gigabit network environment only. Besides, all network appliances connected must enable jumbo frame and use the same MTU value.

Jumbo Frame Setting (MTU)

- Jumbo frame will only work in Gigabit network environment. Please make sure your clients are configured to use the same frame size.

- Jumbo frame setting will work only when all network appliances connected have enabled jumbo frame and use the same MTU value.

Select Jumbo Frame setting: Disable Jumbo Frame, MTU value is 1500 bytes 🐱 Disable Jumbo Frame, MTU value is 1500 bytes Enable Jumbo Frame, MTU value is 4074 bytes Enable Jumbo Frame, MTU value is 7418 bytes

### 3.4.2. Microsoft Networking

| – Micr | osoft | Networking                                |            |
|--------|-------|---|------------|
| ✓      | Enak  | ole file service for Microsoft networking |            |
|        | ۲     | Standalone Server                         |            |
|        |       | Server Description                        | NAS Server |
|        |       | Workgroup                                 | NAS        |
|        |       | Enable WINS server                        |            |
|        |       | Use the specified WINS server             |            |
|        |       | WINS server IP address                    | 0, 0, 0, 0 |
|        |       | Domain Master                             |            |
|        |       |   |            |
|        |       |   | Apply      |
|        |       |   |            |

**Enable file service for Microsoft networking:** If you are using Microsoft Windows, enable this service to access the files on network share folders. Assign a workgroup name.

#### ✓ Standalone Server

Use local users for user authentication.

#### ✓ WINS server

If the local network has a WINS server installed, specify the IP address. FNS-5000B will automatically register its name and IP address with WINS service. If you do not want to enable WINS server support, or you do not have a WINS server on your network, enter **0.0.0.0** in the field for WINS server IP address.

#### ✓ Domain Master

There is a unique Domain Master Browser for collecting and recording resources and services available for each PC in the network or workgroup of Windows. When a domain master browser (Windows 2000 / XP PC) exists already in the network, there is no need to configure FNS-5000B as the domain master.

When you find the waiting time for accessing Network Neighborhood too long, it may be caused by failure of an existing master browser, or there is no master browser in the network. If there is no master browser in your network, you can check the box Domain Master in this section to configure FNS-5000B as the master browser to enhance the speed of accessing information on Network Neighborhood.

## 3.4.3. Apple Network

To use FNS-5000B on Apple Mac operating system, enable AppleTalk network support. If your AppleTalk network uses extended networks, and is assigned with multiple zones, assign a zone name to FNS-5000B. If you do not want to assign a network zone, enter an asterisk (\*) to use the default setting. **This setting is disabled by default.** 

| – Apple Networking            |                      |                           |
|-------------------------------|----------------------|---------------------------|
| Enable AppleTalk file service | for Apple networking |                           |
| Zone                          | *                    |                           |
|                               |                      |                           |
|                               |                      | <ul> <li>Apply</li> </ul> |

## 3.4.4. Web File Manager

To access files on FNS-5000B via web browser, enable Web File Manager. If FNS-5000B is connected to the Internet and uses a valid IP address, you can access files on the server by web browser from anywhere. For more information, please refer to Chapter 9.

## 3.4.5. FTP Service

When you enable FTP service, you can define the port number for the service and maximum number of users connected to the FTP at the same time.

Select to enable or disable Unicode Support. The default setting is No. Since most FTP clients do not support Unicode currently, it is recommended that you disable Unicode support here and select the language the same as your OS in "System Settings—Encoding Setting" page so that the folders and files on FTP can be properly shown (please refer to Chapter 3.3.3). If your FTP client supports Unicode, make sure you have enabled Unicode support for both your client and FNS-5000B.

## 3.4.6. Multimedia Station

To share multimedia files like photos, music or video files on the network, please enable Multimedia Station. For further information, please refer to Chapter 5.

#### - Multimedia Station

 Enable Multimedia Station After enabling this service, click the following link to enter to Multimedia Station. http://10.8.12.27/Qmultimedia/

Apply

#### **UPnP Media Server**

FNS-5000B supports UPnP technology which brings you greater convenience to enjoy multimedia files. By enabling UPnP Media Server, you can share pictures, music and video files on a specific share folder of FNS-5000B (default is Qmultimedia) with any multimedia player that supports UPnP in home and corporate networks. The multimedia player can then search for all supported multimedia files available in the share folder of FNS-5000B and play the files on a display device, e.g. TV. To use UPnP Media Server, please enable this function and click the following link (http://FNS-5000B:9000/) to enter the configuration page of UPnP Media Server. For more details about UPnP Media Server, please refer to TwonkMedia User Manual on the CD. (TwonkyMedia.v3.1)

#### About UPnP

Universal Plug and Play (UPnP) is a set of computer network protocols promulgated by the UPnP Forum. The purpose of UPnP is to allow devices to connect seamlessly and to simplify the implementation of networks at home and in corporate environment. UPnP achieves this by defining and publishing UPnP device control protocols built upon open, Internet-based communication standards.

The term UPnP is gleaned from Plug-and-play, a technology for dynamically attaching devices to a computer directly.

## 3.4.7. Download Station

To use P2P download function of FNS-5000B, please enable Download Station. For further information, please refer to Chapter 6.

| - Dov | wnload Station   |          |
|-------|--|----------|
|       | Enable Download Station<br>After enabling this service, click the following link to enter to Download Station.<br>http://10.8.12.27: <b>8080</b> /Qdownload/ | Apply    |

CRIMINAL PENALTY. USERS ARE SUBJECT TO THE RESTRICTIONS OF THE COPYRIGHT LAWS AND SHOULD ACCEPT ALL THE CONSEQUENCES.

## 3.4.8. Web Server

You can publish your own server by enabling Web Server function of FNS-5000B. Enter the port number for web server service, the default number is 80. For further information, please refer to Chapter 7.

## 3.4.9. View Network Settings

You can view current network settings and status of FNS-5000B in this section.

| - View Network Settings |                       |     |     |       |

## 3.5.1. SATA Disk

This page shows the model, size and current status of the disk(s) installed on FNS-5000B. You can format and check disks, and scan bad blocks on the disks. When the SATA disks are formatted, FNS-5000B will create the following default share folders:

- ✓ Public: Network share for file sharing
- ✓ Qdownload: Network share for Download Station
- ✓ Qmultimedia: Network share for Multimedia Station
- ✓ Qusb: Network share for data copy function via USB ports
- ✓ Qweb: Network share for Web Server

You can create the following disk volumes:

#### • Single Disk Volume

Each disk will be used as a standalone disk. However, if a disk is damaged, all data will be lost.

#### • RAID 1 Mirroring Disk Volume

RAID 1 (mirroring disk) protects your data by automatically backing up the contents of one drive onto the second drive of a mirrored pair. This protects your data if one of the drives fails. Unfortunately, the storing capacity is equal to a single drive, as the second drive is used to automatically back up the first. Mirroring Disk is suitable for personal or corporate use to store important data.

#### • RAID 0 Striping Disk Volume

RAID 0 (striping disk) combines 2 or more drives into one larger disk. It offers the fastest disk access but it does not have any protection of your data if the striped array fails. The disk capacity equals the number of drives in the array times the size of the smallest drive. Striping disk is usually used to maximize your disk capacity or for fast disk access but not for storing important data.

#### Linear Disk Volume

You can combine two or more disks into one larger disk. During file saving, the file will be saved on physical disks sequentially but does not have a disk failure file protection function. The overall capacity of linear disk is the sum of all disks. Linear disk is generally used for storing large data and is not appropriate to use for file protection of sensitive data.

## 3.5.2. USB Disk

FNS-5000B supports USB disks and thumb drives for extended storage. Connect the USB device to the USB port of FNS-5000B, when the device is successfully detected, the details will be shown on this page.

| – USB Disk                                   |   |                                  |

## 3.5.3. USB Printer

1. To provide printer sharing function for network users, you can simply connect a USB printer to the USB port of FNS-5000B. FNS-5000B will detect the printer automatically.

| - USB Printer                    |            |
|----------------------------------|------------|
| Manufacturer:                    | RICOH      |
| Model:                           | IPSiO G717 |
| Status:                          | Ready      |
| Clean up spool space of printer: | Clean now  |

2. A printer icon should be shown in the share folder of the server. Double click the icon.

| 😼 NAS Server (10.8.12.27)   |                 |                    |                  |

| This driver is digitally signed<br><u>Tell me why driver signing is</u> | E ave lusk   |
|   | OK Cancel  |

4. When finished, you can start to use network printer service of FNS-5000B.

## 3.6. User Management **요요**

The files on FNS-5000B can be shared among multiple users. For easier management and better control of users' access right, you have to organize users, user groups and their access right control.

|                 | ∽ <b>4</b>       | ⊱ <u>2</u> =0 | ¢                | - E                                   | 88         |             | $\boxtimes$ | ┏ |

## 3.6.1. Users

The system has created the following users by default:

#### 1. Administrator

By default, administrator has access to system administration and cannot be deleted.

#### 2. Guest

This is a built-in user and will not be displayed on User Management page. When you use a non-registered user name to login, the server will recognize the user as a guest and will allow limited access. A guest does not belong to any user group.

#### 3. Anonymous

This is a built-in user and will not be displayed on User Management page. When you connect to the server by FTP service, you can use this name to login as a guest.

**512 users can be created at maximum** (including system default users). You can create a new user according to your needs. The following information is required to create a new user:

#### ✓ User name

The user name must not exceed 32 characters. It is case-insensitive and supports double-byte characters, such as Chinese, Japanese, and Korean except:

"/\[]:;|=,+\*?<>`'

#### ✓ Password

The password is case-sensitive and can be 16 characters long at maximum. It is recommended to use a password of at least 6 characters.

You can perform the following actions for user management:

## 3.6.2. User Groups

User group is a collection of users with the same access right to files or folders. FNS-5000B has created the following user groups by default:

#### 1. Administrators

All members in this group have administration right. You cannot delete this group.

#### 2. Everyone

All registered users belong to everyone group. You cannot delete this group.

You can manage user groups with the following options:

| +   | Create<br>Add a user group  |
|-----|---|
|     | Create Private Network Share<br>Create a user group's private network share |
| ÷۳. | Assign Users<br>Specify users for a user group                              |
| -   | Delete<br>Remove one or more user groups                                    |
|     |   |

1024 groups can be created at maximum. A group name must not exceed 256 characters.

It is case-insensitive and supports double-byte characters, such as Chinese, Japanese, and Korean, except the following ones:

#### Create Users and Assign Users to User Group

The following example demonstrates how to create new users and assign users to a user group.

**ABC Co.** has recently recruited two employees Mr. Jones Lee for Administration Department and Ms. Jane Wu for Sales Department. The IT Department therefore needs to create two user accounts for them to access company data on FNS-5000B.

i. To create a user account, go to User Management-Users. Click Create.

ii. Enter the user name (Jones Lee/ Jane Wu) and password. Check the box "Continue to set the user groups to which this user belongs" and click **OK**.

| – Add a user          |   |
|-----------------------|---|
| User Name             | Jones Lee   |
| Password              | •••••   |
| Verify Password       | •••••   |
| Note: For increased s | security, password should be at least 6 characters. |
| Continue to set the   | e user groups to which this user belongs            |
|                       |   |
|                       |   |
|                       | OK     K     Cancel                                 |
|                       |   |
| – Add a user          |   |
| User Name             | Jane Wu   |
| Password              | •••••   |
| Verify Password       | •••••   |
| Note: For increased s | ecurity, password should be at least 6 characters.  |
| Continue to set the   | e user groups to which this user belongs            |
|                       |   |
|                       |   |
|                       |   |
|                       | OK     Cancel                                       |

 Select the user groups the users belong to on the right list, i.e. Mr. Jones Lee for Administration Dept and Ms. Jane Wu for Sales Dept, and click Add. Then click Close.

| - Specify the user groups users belong to      |                 |   |
|--|-----------------|---|
| User groups which Jones Lee<br>belongs to      |                 | User groups which <b>Jones Lee</b><br>doesn't belong to |
| everyone                                       | Add<br>Remove   | Administration Dept<br>Sales Dept<br>administrators     |
|  |                 | - Close   |
| Specify the user groups users belong to        |                 |   |
| User groups which <b>Jane Wu</b><br>belongs to |                 | User groups which Jane Wu<br>doesn't belong to          |
| everyone                                       | Add<br>Remove 🔶 | Administration Dept<br>Sales Dept<br>administrators     |
|  |                 | - Close   |

iv. The user names will appear on the list on Create User Page.

#### **Create Private Network Share for User Groups**

You can create particular network share for each user group. The procedure is described as below:

 To create a network share called media accessible by Administration Department only, please go to "User Management—User Groups" page. Select the user group Administration Dept and click Create Private Network Share on the right.

|                 | ☆ ≁ ¤ ∻ ⊟ <u>88</u> ⊡ ⋈ □   |
|-----------------|---|
| Jser Management |   |
| Users           | 1. Select a user group 2. Settings  |
| User Groups     | Administration Dept   |
| • Quota         | Sales Dept<br>administrators<br>everyone       +100 Add a user group         Oreate Private Network Share<br>Create a user group's private network share         Assign Users         Specify users for a user group         Delete<br>Remove one or more user groups |

2. Enter the network share name **media**. Select the disk volume that the share will be created in and specify the path automatically or manually. Enter the comment for the network share, e.g. media folder for Admin Dept and click **Apply**.

- Enter new network share's name, volume and path. Only users that are the members of Administration Dept user group can access this network share.

| Network Share Name | media                        |                           |          |
|--------------------|------------------------------|---------------------------|----------|
| Disk Volume        | Single Disk: Drive1          | ~                         |          |
| Path               | ⊙ Specify path automatically |                           |          |
|                    | OEnter path manually         |                           |          |
|                    |                              |                           | Browse   |
| Comment            | media folder for Admin Dept  |                           |          |
|                    |                              |                           |          |
|                    |                              |                           |          |
|                    | _                            |                           | <br>     |
|                    |                              | <ul> <li>Apply</li> </ul> | × Cancel |

3. You can see the folder media in Network Share Management page.

|                          | \$\$ \$   |   |
|--------------------------|---|---|
| Network Share Management |   |   |
| Network Share Management | 1. Network Shares   | 2. Settings   |

|  |          |               |      |  |             |          |
|  |          |               |      |  | -           | Close    |

## 3.6.3. Quota

To allocate disk volume efficiently, you can specify the quota that can be used by each user. When this function is enabled and a user has reached his/her disk quota, he/she cannot upload data to the server anymore. By default, no limitations are set for users. You can modify the following two options:

- i. Enable quota for all users
- ii. Quota size on each disk volume

| User Management |   |
|-----------------|---|
| Users           | – Quota   |
| User Groups     | Enable quota for all users  |
| Quota           | Quota size on the SATA disk 1000 MB                                       |
|                 | Note: Individual user quota size can be changed in Users • Quota Settings |
|                 |   |
|                 |   |
|                 | OK - Show Quotas  |
|                 |   |

Please refer to the following example to configure the quota setting of users:

The IT department is planning to set the disk quota of Mr. Jones Lee from Administration Department and Ms. Jane Wu from Sales Department on FNS-5000B. The disk quota is 2000MB for Mr. Jones Lee and 4000MB for Ms. Jane Wu.

1. Please go to **Quota** page in **User Management** to enable quota for all users. Enter the quota size on each disk volume, e.g. 1000MB. The quota for individual user can be modified later.

| – Quo | ta                         |                      |                           |              |     |             |
|-------|----------------------------|----------------------|---------------------------|--------------|-----|-------------|
|       | Enable quota for all users |                      |                           |              |     |             |
|       | Quota size on the SATA d   | isk                  |                           | 1000         | MB  |             |
|       | Note: Individual user quot | a size can be change | d in <mark>Users</mark> · | Quota Settin | gs  |             |

# 3.7. Network Share Management

The primary purpose of network storage is file sharing. You can create different network share folders for various types of files, and provide different file access rights to users or user groups.

|  | 谷                 | 4           | 2 <b></b> 0                 |              |             | <u> 2</u> 2  |          | $\bowtie$ | ┏ |

#### There are five options in Network Share Management:

| + | Create<br>Create a network share                                 |
|---|--|
|   | Property<br>Change the name, path and comment of a network share |
|   | Access Control<br>Set access right for a network share           |
|   | Delete<br>Remove a network share                                 |
| 2 | Restore<br>Restore default network shares                        |

## 3.7.1. Create

To create a network share, enter the following information:

✓ Network share name

The length of the network share name cannot exceed 32 single-byte characters or 10 double-byte characters, and cannot contain the following characters:

" . + = / \ : | \* ? <> ; [ ] %

✓ Disk volume

This area shows the disk volume status.

✓ Path

All data is stored under the assigned path onto the disk volume. You can select "Specify path automatically" or assign a path manually. The path cannot exceed 256 characters and cannot contain the characters below:

".+=/\:|\*?<>;[]%

✓ Comment

Enter a brief description for the share folder. The comment cannot exceed 128 characters.

| - Create  |                                    |      |   |   |        |
|---|------------------------------------|------|---|---|--------|
| Network Share Name  |                                    |      |   |   |        |
| Path  | $\odot$ Specify path automatically |      |   |   |        |
|   | OEnter path manually               |      |   |   |        |
|   |                                    |      | ] |   | Browse |
| Comment   |                                    |      | ] |   |        |
| <ul> <li>✓ Grant full access righ</li> <li>Grant read access rig</li> <li>✓ Continue to set access</li> </ul> |                                    |      |   |   |        |
|   |                                    | • OK |   | × | Cancel |

## 3.7.2. Property

To edit the property of an existing network share, select a share and click **Property**. You can then edit the content of that share.

| 1. Network Shares   | 2. Settings   |   |
|---|---|---|
| Public<br>Qdownload<br>Qmultimedia<br>Qusb<br>Qweb<br>media |   | Create<br>Create a network share<br>Property<br>Change the name, path and comment of a network share<br>Access Control<br>Set access right for a network share<br>Delete<br>Remove a network share<br>Restore<br>Restore default network shares |
| - Property  |   |   |
| Path /me<br>Comment med                                     | gle Disk: Drive1<br>dia<br>lia folder for Adn<br>e's volume or pa | Browse Browse ath of the share, all data that has already existed in the original   |
|   |   | OK      Cancel  |

## 3.7.3. Access Control

When a network share is created, you can assign access rights to users or user groups:

✓ Deny access

Access to the network share will be denied.

✓ Read only

Users can read the files only on the network share.

✓ Full access

Users can read, write, create, or delete files and folders on the network share.

| - Access Control   |                            |  |      |  |                |               |
|--|----------------------------|--|------|--|----------------|---------------|

## 3.8.1. Alert Notification

Enter the e-mail address of the administrator and the IP address of the SMTP server. In case of warning or malfunction, e.g. CPU fan fails, a drive fails or is unplugged, an email will be sent to the administrator automatically. You can go to Event Logs (refer to Chapter 3.9) to check the details of all errors and warnings.

If your mailbox requires SMTP authentication, enter the user name and password.

| <b>Note:</b> It is recommended the alert mails.   | ed to send a test e-mail to make sure you can receive  |

|   | • Apply  |

## 3.8.2. Restart/ Shutdown

Select to restart or shut down FNS-5000B.

| – Restart / Shutdown   |         |           |
|--|---------|-----------|
| To restart the server, click Restart.<br>To shut down the server, click Shut Down. |         |           |
|  | Restart | Shut Down |

## 3.8.3. Hardware Settings

#### You can enable or disable the hardware functions of FNS-5000B.

| - | Hardy               | ware Settings   |
|---|---------------------|---|
|   | <ul><li>✓</li></ul> | Enable configuration reset switch   |
|   |                     | Enable hard disk standby mode (if no access within 30 minutes 💌 )                         |
|   |                     | Enable light signal alert when the free size of SATA disk is less than the value: 3072 MB |
|   |                     | Auto power on when power resumes after power loss   |
|   |                     |   |
|   |                     |   |
|   |                     |   |
|   |                     | <ul> <li>Apply</li> </ul>   |
|   |                     | Арру  |

- Enable configuration reset switch
   By enabling this option, you can press the reset button for 5 seconds to reset the administrator password and system settings to default.
- ii. Enable hard disk standby mode

When this function is enabled, hard disk will go to standby mode if there is no access within the specified period.

- iii. Enable light signal alert when the free size of SATA disk is less than the value The Status LED indicator will blink red and green when this function is enabled and the free space of the SATA disk is less than the value. The range of the value is 1-51200 MB.
- iv. Auto power on when power resumes after power loss
   When this function is enabled, FNS-5000B will turn on automatically when power resumes after improper shutdown or power loss.

## 3.8.4. System Update

| - System Update   |
|---|
| Note: If the system is running properly, you do not need to update the firmware.  |
| Current firmware version: 1.2.0 Build 0712  |
| Before updating system firmware, please make sure the product model and firmware version are correct. Follow the steps below to update firmware:<br>Step 1: Download the release notes of the same version as the firmware from LevelOne website http://www.level1.com/ Read the release notes carefully to make sure you need to update the firmware.<br>Step 2: Before updating system firmware, back up all disk data on the server to avoid any potential data loss during system update.<br>Step 3: Click the (Browse) button to select the correct firmware image for system update. Click the [Update System] button to update the firmware.<br>Note: System update may take tens of seconds to several minutes to complete depending on the network connection status. Please wait patiently. The system will inform you when system update is completed.<br>Browse |
|   |

**Note:** If the system is running properly, you do not need to update the firmware.

Before updating system firmware, please make sure the product model and firmware version are correct. Follow the steps below to update firmware:

**Step 1:** Download the release notes of the same version as the firmware from LevelOne website http://www.level1.com/. Read the release notes carefully to make sure you need to upgrade the firmware.

**Step 2:** Before upgrading system firmware, back up all disk data on the server to avoid any potential data loss during system update.

**Step 3:** Click the [Browse...] button to select the correct firmware image for system update. Click **Update System** to update the firmware.

**Note:** System update may take tens of seconds to several minutes to complete depending on the network connection status. Please wait patiently. The system will inform you when system update is completed.

## 3.8.5. Change Logo

You can choose your own picture to display on the login page of FNS-5000B. The size of the picture cannot exceed 20K bytes.

#### Change Logo

Please select an image from the **To be displayed** pull-down menu. Then click **[Apply]** to confirm the change.

To upload your own image, click **[Browse...]** to select the image. Then click **[Upload]** to upload the image.

To replace an image, select an appropriate image from the **To be replaced to** pull-down menu and click **[Apply]**.

Note: For the best image effect, the recommended size for the image is 100 x 100 pixels.

Apply

## 3.8.6. Remote Replication (Disaster Recovery)

Remote Replication enables you to replicate files on FNS-5000B to another FNS-5000B or LevelOne NAS series. The files will be compressed before the replication process in order to save time for data transfer. **Make sure a network share is created before creating a remote replication task.** 

#### **Using Remote Replication**

Login FNS-5000B and go to Remote Replication in System Tools.

## 4. Copy USB Ports Data Directly

FNS-5000B supports direct copy of data on USB devices to FNS-5000B by using the Copy button. To use this function, please follow the steps below:

- 1. Make sure a SATA disk is installed correctly in FNS-5000B according to the instructions in Chapter 2.1.
- 2. Turn on FNS-5000B.
- Format the SATA disk in SATA Disk page of Device Configuration (refer to Chapter 3.5.1). A system default folder Qusb will be created in FNS-5000B.
- 4. Connect USB devices, e.g. digital camera, flash to the front USB port of FNS-5000B.
- 5. Press the Copy button on FNS-5000B. All data on the USB device will be copied to the folder Qusb/(xxxxyzz)\* on FNS-5000B instantly.

#Intelligent one touch copy button: FNS-5000B will detect the data in the connected USB device automatically. The first time a USB device is connected, press the Copy button and FNS-5000B will copy all data in the device automatically. When the same device is connected again and there are changes to the data in the device, press the Copy button and FNS-5000B will copy all files in the device. If there are no changes, press the Copy button and FNS-5000B will not copy the files.

\* xxxx: year; yy: month; zz: date

**Note:** USB auto copy function supports only USB device of 10GB storage capacity or less.

## 5. Multimedia Station

FNS-5000B provides a user-friendly web management interface for you to manage personal albums easily. You can view images and multimedia files, or browse photos by thumbnails preview.

#### A. Upload photos by web administration

1. To use Multimedia Station of FNS-5000B, make sure a SATA disk is installed correctly in FNS-5000B according to the instructions in Chapter 2.1. A share folder Qmultimedia will be created. Enable Multimedia function in Network Settings.

2. Click on the link http://FNS-5000B IP/Qmultimedia on Multimedia Station page or click Multimedia Station on the login page of FNS-5000B to access Multimedia Station.

3. Click O on the top right hand corner. Login with administrator name and password to manage Multimedia Station. Users without administration right can view the photos and multimedia files on Multimedia Station but they do not have the right to modify the files.

| Multimed    | ia Station  | 0          | 9 CO   |
|-------------|---|------------|--------|
| Photo Album | Location: / Qmultimedia                               | - Meretice |        |
|             | Directory: (0) Files: (0)<br>No files in this folder. | A→Z →      | 1 → 30 |

4. Click Browse to select the multimedia file and then click Upload to upload the file to the folder.

5. You can also create folders by clicking <sup>4</sup> and upload files to the folders.

#### B. Upload photos to Qmultimedia folder directly

You can upload multimedia files to FNS-5000B directly by the following steps.

1. Use Run function in Windows. Enter \\[server name] or \\[server IP] to access share folder on FNS-5000B.

| Run   | ? 🗙  |
|-------|--|
| -     | Type the name of a program, folder, document, or<br>Internet resource, and Windows will open it for you. |
| Open: | \\NA5556677  |
|       | OK Cancel <u>B</u> rowse   |

2. Open the folder Qmultimedia. Enter the user name and password to login.

You can use the buttons on top of the photo to manage the album.

#### Play music or video files

To play music or video files on Multimedia Station, you can click on the thumbnail of the file displayed on the page. The file will be played by your default music or video playing program.

## 6. Download Station

FNS-5000B supports P2P download mechanism. You can add download task to FNS-5000B and let the server finish downloading independent of PC.

**Note:** Please be warned against illegal downloading of copyrighted materials. The Download Station functionality is provided for downloading authorized files only. Downloading or distribution of unauthorized materials may result in severe civil and criminal penalty. Users are subject to the restrictions of the copyright laws and should accept all the consequences.

1. To use Download Station, make sure one or two SATA disks are installed correctly in FNS-5000B according to the instructions in Chapter 2.1. A share folder Qdownload will be created. Enable this function in Network Settings.

2. Click on the link http://FNS-5000B IP/Qdownload on Download Station page or click Download Station on the login page of FNS-5000B to access Download Station.

3. Click **Add new download task** on the left and upload a torrent file. You can download legal torrent files by searching on the Internet. There are websites that provide legally sharing torrents e.g. <u>www.legaltorrents.com</u>. Please download the torrent files to your local disk and then upload them to FNS-5000B.

5. You can select an available download task and click Set Share Time to configure the time for sharing the torrent file, or click Set Config to set the maximum number of downloads at the same time (default value is 3). You can also set the maximum download and upload rate (default value is 0, which means unlimited), and port range (default range is 10000-80800).

## 7. Web Server

FNS-5000B enables you to upload web pages and manage your own website easily by Web Server function. It also supports PHP and SQLite for you to establish an interactive website. Once you activate Web Server function, you can access your own homepage from anywhere. You can add hyperlinks in your homepage to connect to all the features of FNS-5000B, such as Download Station, Multimedia Station and Web Server.

1. To use Web Server, make sure a SATA disk is installed correctly in FNS-5000B according to the instructions in Chapter 2.1. A share folder Qweb will be created. Enable Web Server function and enter the port number in Network Settings.

| Download Station      |      |   |            |               |          |  |            |                           |           |  |
| Web Server            |      |   |            |               |          |  |            | <ul> <li>Apply</li> </ul> |           |  |
| View Network Settings |      |   |            |               |          |  |            |                           |           |  |

- 2. You can upload your HTML files to the folder Qweb by the following methods:
- A. By using samba: You can open a web browser and type \\[FNS-5000B IP]\Qweb or \\[FNS-5000B name]\Qweb. Login the folder and upload your HTML files.
- B. By FTP: You can login FTP service and upload your HTML files to the folder (please refer to Chapter 8).
- C. By Web File Manager: You can login Web File Manager and upload your HTML files to the folder (please refer to Chapter 9).

The file index.html or index.htm will be the home path of your webpage.

3. Click on the link http://FNS-5000B IP/ on Web Server page or click Web Server on the login page of FNS-5000B to access the web page you upload. Note that when Web Server is enabled, you have to type [http://FNS-5000B IP address:8080] in your web browser to access the login page of FNS-5000B.

## **FNS-5000B**

#### **SQLite Management**

SQLiteManager is a multilingual web-based tool to manage SQLite databases and can be downloaded from http://www.sqlitemanager.org/.

Please follow the steps below or refer to the INSTALL file in the downloaded SQLiteManager-\*.tar.gz<sup>?</sup> to install the SQLiteManager.

- (1) Unpack your download file SQLiteManager-\*.tar.gz.
- (2) Upload the unpacked folder SQLiteManager-\* to \\FNS-5000B IP\Qweb\.
- (3) Open your web browser and go to http://FNS-5000B IP/SQLiteManager-\*/.

<sup>?</sup> : The symbol "\*" refers to the version number of SQLiteManager.

## 8. FTP Server

FNS-5000B supports FTP service. To use FTP service, enable this function in Network

Settings and follow the steps below:

|                       | 合 <b>4</b>                        | 2=20 <b>;-</b> -              |                     | <u> 2</u> 2 |               | $\bowtie$ | ┎┏ |

## 9. Web File Manager

#### Using Web File Manager

To use Web File Manager, enable web service in Network Settings first.

|   | ☆ ≁ ヵ 🔁 📥 🛯 🖂 🕞   |
|---|---|
| Network Settings                          |   |
| TCP/IP Configuration                      | – Web File Manager  |
| Microsoft Networking                      | 🗹 Enable Web File Manager   |
| Apple Networking                          | After enabling this service, click the following link to enter to Web File Manager. |
| Web File Manager                          | http://10.8.12.27: 8080 /Qfilemanager/  |
| FTP Service                               |   |
| Multimedia Station                        | Apply   |
| Download Station                          |   |
| Web Server                                |   |
| <ul> <li>View Network Settings</li> </ul> |   |

Launch the web browser and go to FNS-5000B administration page. Select **Web File Manager** and enter the correct login name and password. You may also enter "guest" in the login name field without password to access the network shares on FNS-5000B as an anonymous guest.

**Note:** Make sure a network share has been created before using Web File Manager.

Select an existing network share.

|   | FTP          |                      |
|---|--------------|----------------------|
| - | Share Folder | Comment              |
|   | Public       | System default share |
|   | Qdownload    | System default share |
|   | Qmultimedia  | System default share |
|   | Qusb         | System default share |
|   | Qweb         | System default share |
|   |              |                      |

You can organize share folders of FNS-5000B. With Web File Manager, you can upload, rename, or delete files and folders in the network shares.

#### View files online

Click on a file displayed on the web page. The information of the file will be shown. If your browser does not support the file format, a download window will pop up automatically. Download the file and you can open it on your PC.

#### **Create folder**

- i. Select a network share or folder in which you want to create a new folder.
- ii. Click (Create Folder) on the toolbar.
- iii. Enter the name of the new folder and click OK.

#### Rename file or folder

- i. Select a file or folder to rename.
- ii. Click (Rename) on the toolbar.
- iii. Enter the new file or folder name and click OK.

#### Delete file or folder

- i. Select a file or folder to delete.
- ii. Click (Delete) on the toolbar.
- iii. Confirm to delete the file or folder.

#### Upload file

- i. Open the folder to upload file to.
- ii. Click **Browse** to select the file.
- iii. Click Upload.

#### Download file

- i. Select a file to download.
- ii. Right click the file and select "Save Target As" to save the file.

#### Logout

To exit Web File Manager, click (Logout).

#### Viewing Files Named in Local Language

To view files named in Chinese, you may have to configure the browser settings. Take Internet Explorer as an example, follow the steps below to configure the settings.

1. Click on **Tools** in IE browser.

| File     | Edit  | View            | Favorites       | Tools       | Help             |             |                  |          |         |                |   |

## 10. Maintenance

FNS-5000B is specially designed to run 24x7 and be ready at all times against system crash caused by power outage. This section provides a general overview on system maintenance.

### 10.1. Restart/ Shut down Server

Follow the steps below to restart or shut down FNS-5000B.

- 1. Enter the administration page and select Restart/ Shutdown in System Tools.
- 2. Click Restart to reboot the server or Shut Down to turn off the server.

| – Restart / Shutdown   |         |                               |
|--|---------|-------------------------------|
| To restart the server, click Restart.<br>To shut down the server, click Shut Down. |         |                               |
|  | Restart | <ul> <li>Shut Down</li> </ul> |

### **10.2. Reset Password and Network Settings**

To reset the administrator password and network settings of FNS-5000B,

Press the reset button of FNS-5000B for a few seconds. A beep sound will be heard.

Login FNS-5000B with the default user name and password:

**Note:** To reset the system by the reset button, the option "Enable configuration reset switch" in Hardware Settings must be activated.

|                                       | ☆ ≁ Þ¤ ↔ ⊟ & C 🖂 🖓  |

| Alert Notification                    | <ul> <li>Hardware Settings</li> </ul>   |
| Restart/ Shutdown                     | Enable configuration reset switch   |
| <ul> <li>Hardware Settings</li> </ul> | 🗹 Enable hard disk standby mode (if no access within 30 minutes 🌱 )                       |
| System Update                         | Enable light signal alert when the free size of SATA disk is less than the value: 3072 MB |
| Change Logo                           | Auto power on when power resumes after power loss   |
| Remote Replication                    |   |
| Backup/ Restore/ Reset     Settings   | Apply   |

### 10.3. Disk Failure or Malfunction

When you encounter disk malfunction or failure, please do the following:

- 1. Record the malfunction status or error messages shown in Event Logs.
- 2. Stop using the failed FNS-5000B and turn off the server.
- 3. Contact customer service for technical support.

**Note:** FNS-5000B must be repaired by professional technicians, do not try to repair the server yourself.

Please back up any important files or folders to avoid potential data loss due to disk crash.

## 10.4. Power Outage or Abnormal Shutdown

In case of power outage or improper shutdown of FNS-5000B, the system will resume to the state before it is shut down. If your server does not function properly after restart, please do the following:

- 1. If the system configuration is lost, configure the system again.
- 2. In the event of abnormal operation of the server, contact customer service for technical support.

To avoid the above situations, please back up your data periodically and make sure you have done the following:

- Follow the instructions described in Chapter 10.1 to restart or shut down the server.
- If there is an anticipated power outage, back up all important data and turn off the server properly until power supply is resumed.
