

KVM-0223
Cable KVM Switch, 2 Ports, VGA, USB, Audio
User Manual

Introduction

The LevelOne KVM-0223 USB Cable KVM Switch offers users a high resolution VGA video interface and eliminates connection headaches with two sets of fixed USB KVM & Audio / Mic combo cables. A wired QuickSwitch! button further enhances the user's experience by switching from one computer to another with just the touch of a button.

The LevelOne KVM-0223 also supports switching client software with both Windows and Mac OS supported. LevelOne freeware can be installed on networked computers for intuitive menu-driven switching action. A desktop icon displays which port is currently active, giving users an easy interface with the devices, an LED display provides easy status monitoring and keyboard hotkeys offer even more convenience with a third way of switching between devices.

The two USB 2.0 keyboard and mouse ports are transparent USB hub ports that feature full driver support for advanced keyboard/mouse action. In addition, they can also be connected to other high-speed devices such as USB disk storage.

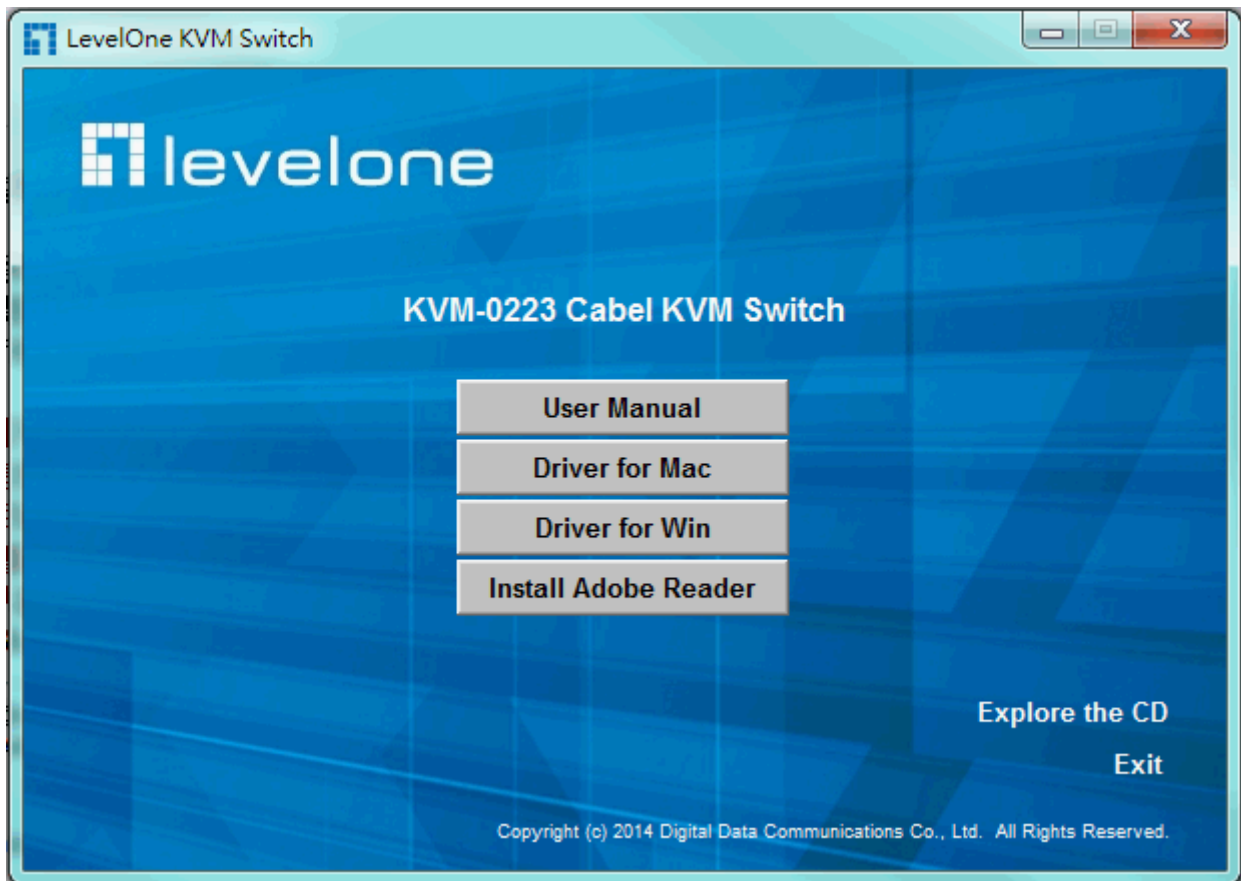

Key Features:

- Analog Video up to 2048 x 1536
- 1 x wired QuickSwitch! Button for instant switching
- 2 x fixed VGA USB KVM audio/mic combo cables
- Windows and Mac switching software support
- USB 2.0 hub ports for keyboard, mouse or other high-speed USB devices
- VGA analog video up to 2048 x 1536 pixels
- Independent/simultaneous switching of PC and audio/mic channel
- User-definable hotkeys and universal hotkey for computer switching
- LED display for easy status monitoring

Out-of-Box Installation

Take the Support CDROM and the Cable KVM Switch out of the box and follow the steps below for installation....

- Step 1.** Insert the Support CD ROM into your CD drive, and The installation interface will pop up (If the Autorun feature has not been enabled on your computer. Just find the Autorun.exe on the CDROM and double-click it to start.)
- Step 2-1. For Windows/Mac:** Just click the “Software Installation for Window” to start Windows switcheqdi r software installation. To install Mac version, please copy the file (*.pkg format) to the local hard disk and install it from there. Follow the instructions to completion. If the instillation is complete, you will see a KVM Switcher icon on the system tray of your desktop. Right-click to evoke the operation menu and double-click to evoke configuration box. For operation details of the KVM Switcher software, please refer to the following sections.

No live connection detected

Current active computer channel is on port 1

Current active computer channel is on port 2

- 💡 The Mac version of the KVM switcher software supports only Mac OS 10.4 (Tiger) and later. Earlier version of the Mac OS might or might not work well with it.
- 💡 The KVM Switcher Software supports both the Windows and the Mac OS operating systems. For other OS platforms such as Linux, you can still use the universal keyboard hotkey - *ScrLk* + *ScrLK* - to switch computer. However, this switching hotkey is not available on non-computer platform such as Mac OS.

Step 3. Connect a set of the fixed KVM/Audio&Mic cables to a computer's connectors. Connect another set of cables to another computer. Now you can operate the KVM Switch immediately.

- ⚡ Some older computers with USB interface might need to manually enable the USB option in the BIOS settings before you can use any USB devices. If your USB interface does not work, please check the USB option status in the BIOS.
- ⚡ If you have not yet installed a USB mouse on your computer, there might be an error message telling you that mouse is not detected and prompting you to decide whether to ignore the same message in the future, and yet you found there is no mouse movement to disable this message....So it is suggested that you should install your USB mouse on your computer first, before connecting it to this KVM Switch.

Ways for KVM Switch Operation

There are three methods to control your KVM Switch for computer and Audio/Mic channel selection: using (1) the QuickSwitch Button (a wired remote control), (2) a hotkey sequence or (3) the KVM Switcher Software.

QuickSwitch button (a wired remote control)

The QuickSwitch button is a wired remote control that allows you a direct switching control. Simply press the button to toggle between the two computers.

 You can use the QuickSwitch button to switch to an empty port that is not connected with any computer. Normally, if you use keyboard hotkey or the KVM Switcher software, you will not be able to switch to an empty port (and audio/mic channel, if binding is enabled). By default, PC port switching and audio/mic port switching are bound together, unless you specify the audio to be fixed a specific port.

Keyboard hotkeys

User-definable hotkeys for computer selection:

Hotkey sequence = Ctrl + Alt + [command key]*

* **Please refer to next section for keys that are qualified to be used as a command key**

Universal hotkey for computer toggle-switching:

 ⚡ Both the universal hotkey, ScrLk + ScrLk and the user-definable hotkey, Ctrl + Alt + [command key] **WILL NOT** allow you to switch to an empty port that is not connected with any computer. To force your KVM to switch to an empty port, just press the QuickSwitch button to switch.

Universal Hotkey sequence = ScrLk + ScrLk

* **For other operating systems on computer such as Linux, you can still use this special hotkey to facilitate computer switching. This special hotkey is not available for Mac. HOWEVER, you can press QuickSwitch button to switch in any case.**

⚡ Each keystroke within a hotkey sequence should be pressed within 2 seconds.

Otherwise, the hotkey sequence will not be validated.

⚡ After port switching you have to wait till the KVM Switch icon shows forth the target port before you can perform next switching again. The KVM Switcher icon could be found on the system tray/task bar of your Windows/ Mac OS desktop after its installation.

⚡ All the hotkeys are only functional after your computers are booting into the OS. If you want to switch computer in the BIOS/preboot stage, press the QuickSwitch button to switch.

KVM Switcher Software (Windows & Mac platform)

In addition to computer switching, the KVM Switcher Software also allows you more advanced functions such as described in the next section....

KVM Switcher Operation Reference

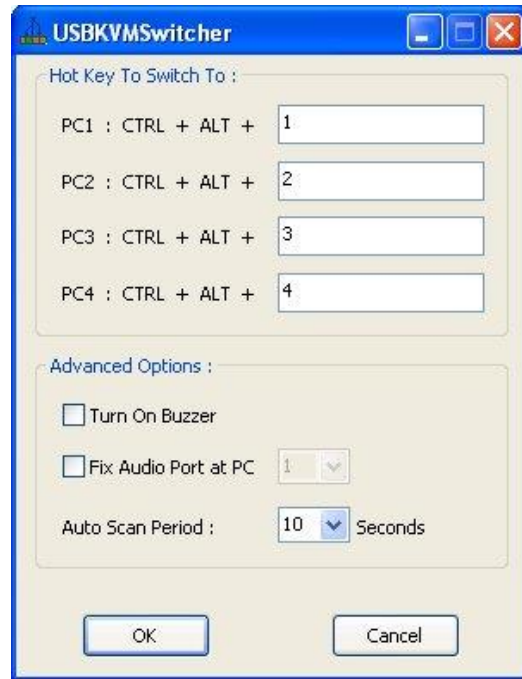

Switch to Computer x by Operation Menu

Right-click the KVM Switcher icon to evoke the operation menu, then select whichever computer that is available for switching. Once you select a computer channel, it will immediately switch to that computer. Note that the unconnected port(s) or the active port will be grayed-out and non-selectable.

Windows :

Operation Menu

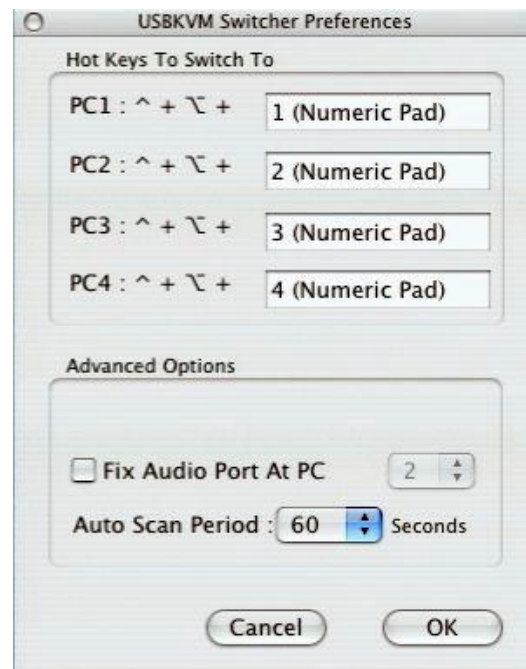

Configuration Dialog Box

Mac OS:

Operation Menu

Configuration Dialog Box

 The Mac version of KVM switcher user: if you want the KVM switcher open at login or kept in Doc, just select the option in the Operation Menu accordingly.

Switch to computer x by Keyboard Hotkeys

Hit the hotkey according to your current hotkey definition:

Hotkey sequence = Ctrl + Alt + [command key]*

*** The factory default hotkey setting is Ctrl + Alt + 1/2/3/4 for computer 1/2/3/4. You can also use ScrLk + ScrLk to switch COMPUTER.**

Start Auto-scan

Right-click the KVM Switcher icon to evoke the operation menu, then select *Start Auto-Scan* to activate autoscanning.

Stop Auto-scan

(While autoscanning) right-click the KVM Switcher icon to evoke the operation menu, then select *Stop Auto-Scan* to de-activate autoscanning.

KVM Switcher configuration

Right-click the KVM Switcher icon and select *Settings* or double-click the icon to bring up the configuration dialog box.

Define Hotkey commands

You can specify the command key as you like by typing it in. For example, you can specify the hotkey for switching to COMPUTER 1 as CTRL + ALT + A by typing an A (not case-sensitive) in the editable field.

Hotkey = Ctrl+ Alt + [Command key]*

*** The command key is user-definable via the configuration dialog box**

 Except those control keys such as Alt, Ctrl, Shift, CAPS, Tab, Esc and those functions keys and edit keys, all other keys on the keyboard, including those number keys on the number pad are all qualified to be used a hotkey command key. In addition to the software KVM Switching by the operation menu and the user-defined hotkeys, you can always use the universal hotkey for COMPUTER switching – ScrLk + ScrLk

Fix Audio Port at Computer x

Check this option and then select the computer to fix the audio/mic channel to the selected computer. Once this option is checked, the audio/mic channel will be fixed and become non-switchable.

Auto Scan Period

Select the Autoscan period from 10 ~ 60 seconds with an increment of 5 seconds. The Autoscan period is the time your KVM Switch will wait to switch to next computer.

Verklaring van Conformite

Declaration of Conformity

We, the undersigned, Digital Data Communications GmbH

Address Zeche-Norm-StraBe 25 44319 Dortmund Germany

Certify and declare under our sole responsibility that the following apparatus

Type KVM Switch

Brandname LevelOne

Product KVM-0223

**Conforms with the essential requirements of the EMC Directive
2004/108/EC, based on the following specifications applied:**

EU harmonised standards

- EN 55022:2006+A1:2007 Class B
EN61000-3-2:2006
EN61000-3-1:1995+A1:2001+A2:2005
- EN 55024:1998+A1:2001+A2:2003
IEC 61000-4-2: 2001; IEC 61000-4-3: 2006; IEC 61000-4-4: 2004; EC 61000-4-5: 2005;
IEC 61000-4-6: 2006; IEC 61000-4-8: 2001; IEC 61000-4-11: 2004

and therefore complies with the essential requirements and provisions of the EMC Directive.

The symbol confirms that this product conforms to the above named standards and regulations.

Declaración de Conformidad

El fabricante **Digital Data Communications GmbH**
Dirección: Zeche-Norm-StraBe 25 44319 Dortmund Germany

Declara mediante este documento que el producto

Tipo KVM Switch
Producto KVM-0223
Marca LevelOne

Cumple con las siguientes directivas:

- Directiva EMC 2004/108/EC

El producto cumple asimismo con las siguientes normas:

- EN 55022:2006+A1:2007 Class B
EN61000-3-2:2006
EN61000-3-:1995+A1:2001+A2:2005
- EN 55024:1998+A1:2001+A2:2003
IEC 61000-4-2: 2001; IEC 61000-4-3: 2006; IEC 61000-4-4: 2004; EC 61000-4-5: 2005;
IEC 61000-4-6: 2006; IEC 61000-4-8: 2001; IEC 61000-4-11: 2004

Este producto ha sido diseñado para su uso sólo en interiores.
La marca CE certifica que este producto se adecua a las especificaciones y regulaciones arriba mencionadas.

Este producto es adecuado para todos los países de la UE.
