# MDU-2400FXC <br> 4 Port 100Mbps SC Fiber Switch Module 

MDU-2800TX<br>8 Port 10/100Mbps Fast Ethernet Switch Module

MDU-2100SX<br>1000SX Gigabit Switch Module

## Installation Guide

## Introduction

MDU-2400FXC 4 Port 100Mbps SC Fiber Switch Module
There are two open slots ('MODULE 1' and 'MODULE 2') on the front panel of the Scalable Ethernet Switch. The user can choose to slide in up to two of the FX modules to increase the link distance. This users guide describes the installation steps for the 4Port 100Base-FX fiber module. Also note that the module only works when incorporated with the base unit. For detailed system level operation, please refer to the Users Manual.

## MDU-2800TX 8 Port 10/100Mbps Fast Ethernet Switch Module

There are two open slots ('MODULE 1' and 'MODULE 2') on the front panel of the Scalable Ethernet Switch. The user can choose to slide in up to two of the modules to increase $10 / 100 \mathrm{Mbps}$-port density. This users guide describes the installation steps for the 8 -Port 100Base-TX module. Also note that the module only works when incorporated with the base unit. For detailed system level operation, please refer to the Users Manual.

## MDU-2100SX 1000SX Gigabit Switch Module

There are two open slots ('MODULE 1' and 'MODULE 2') on the front panel of the Scalable Ethernet Switch. The user can choose to slide in up to two of the modules to equip the system with 1000 Mbps port capability. This users guide describes the installation steps of the Port 1000Base-SX fiber module. Also note that the module only works when incorporated with the base unit. For detailed system level operation, please refer to the Users Manual.

## Installation

Please be sure the power of the system is down during the installation. Insertone or two modules into the slots on the front panel of the switch (be sure the module is aligned within the guide-rails and that the two fasteners on the front side of the module are tightened), as shown in the following figure.

GSW-1600TXM with MDU-2400FXC

GSW-1600TXM with MDU-2800TX

GSW-1600TXM with MDU-2100SX

Note: For MDU-2100SX 1000SX Gigabit Switch Module. The transmitter of the Fiber Optic Transceiver is on the left-hand side (the one close to the Power LED) while the receiver is on the right-hand side (the one close to the Link LED).

## Status LEDs

## MDU-2400FXC 4 Port 100Mbps SC Fiber Switch Module

Once the module(s) slides into the open $\operatorname{dot}(\mathrm{s})$ on the front panel of the switch, the LED indicators for the module(s) will be shown in the LED Monitor area of the. The display includes all the possible configurations. For instance, when the 'MODULE 1' slot is occupied, LED columns 17 to 20 are used as indicators for the module. When the 'MODULE 2' slot is used, LED columns 25 to 28 are the indicators. There are three LEDs for each port. Their definitions are described as follows:

## 10/100Mbps LED

| Off | Not Applicable |
| :--- | :--- |
| Solid Green | 100 Mbps |

Full/Col LED

| Off | Half Duplex operation (Default) |
| :--- | :--- |
| Solid Green | Full Duplex operation |
| Blinking Amber | Collisions detected for half Duplex operation. |

Link/Act. LED

| Off | Port is link down. |
| :--- | :--- |
| Solid Green | Port is link up and no traffic. |
| Blinking Green | Port is link up and with traffic. |

## MDU-2800TX 8 Port 10/100Mbps Fast Ethernet Switch Module

Once the module(s) slides into the open slot(s) on the front panel of the switch, the LED indicators for the module(s) will be shown in the LED Monitor area. The display includes all the possible configurations. For instance, when the 'MODULE 1' slot is occupied, LED columns 17 to 24 are used as indicators for this module. When the 'MODULE 2' slot is used, LED columns 25 to 32 are the indicators. There are three LEDs for each port. Their definitions that described as follows:

## 10/100Mbps LED

| Off | 10 Mbps (Default) |
| :--- | :--- |
| Solid Green | 100 Mbps |

Full/Col LED

| Off | Half Duplex operation (Default) |
| :--- | :--- |
| Solid Green | Full Duplex operation |
| Blinking Amber | Collisions detected for half Duplex operation. |

Link/Act. LED

| Off | Port is link down. |
| :--- | :--- |
| Solid Green | Port is link up and no traffic. |
| Blinking Green | Port is link up and with traffic. |

## MDU-2100SX 1000SX Gigabit Switch Module

Once the module(s) slides into the open slot(s) on the front panel of the switch, the LED indicator for the module(s) will be shown on the module itself. Note also that, when the 'MODULE 1' slot is occupied, the port becomes Port 17 of the switch. When the 'MODULE 2' slot is used, the port becomes Port 25 of the switch. There are three LEDs for the 1000Mbps port. Their definitions are described as follows:

## Power LED

| Off | No power |
| :--- | :--- |
| Solid Green | System is in operation. |

Full/Col LED

| Solid Green | Full Duplex operation |
| :--- | :--- |
| Solid Yellow | Half Duplex operation |
| Blinking Yellow | Collisions detected for half Duplex operation. |

Link/Act LED

| Off | Port is link down. |
| :--- | :--- |
| Solid Green | Port is link up and no traffic. |
| Blinking Green | Port is link up and with traffic. |

## Technical Specification

| MDU-2400FXC 4 Port 100 Mbps SC Fiber Switch Module |  |
| :--- | :--- |
| Standard | IEEE802.3u, 100Base-FX |
| Interface | Fiber SC connector |
| Environment | Temperature: |
|  | $\quad$ Operating: $0^{\circ} \mathrm{C}$ to $40^{\circ} \mathrm{C}$ |
|  | Storage: $-20^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}$ |
|  | Humidity: |
|  | $\quad$ Operating: $10 \% \mathrm{RH}$ to $90 \% \mathrm{RH}$ |
| Dimension | $\quad 145 \times 116.8 \times 25 \mathrm{~mm}(\mathrm{~W} \times \mathrm{D} \times \mathrm{H})$ |
|  | $5.7 \times 4.6 \times 0.98$ in |
| EMI | $\mathrm{FCC}, \mathrm{CE}, \mathrm{VCCI}$ Class A |

MDU-2800TX 8 Port 10/100Mbps Fast Ethernet Switch Module
Standard IEEE802.3u, 100Base-TX
Interface RJ-45 connector
Environment Temperature:
Operating: $0^{\circ} \mathrm{C}$ to $40^{\circ} \mathrm{C}$
Storage: $-20^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}$
Humidity:
Operating: $10 \% \mathrm{RH}$ to $90 \% \mathrm{RH}$
Storage: $5 \%$ RH to $90 \%$ RH
Dimension $\quad 145 \times 116.8 \times 25 \mathrm{~mm}(\mathrm{~W} \times \mathrm{D} \times \mathrm{H})$
$5.7 \times 4.6 \times 0.98$ in
EMI FCC, CE, VCCI Class A

MDU-2100SX 1000SX Gigabit Switch Module
Standard IEEE802.3z, 1000Base-SX
Interface Fiber SC connector
Environment Temperature:
Operating: $0^{\circ} \mathrm{C}$ to $40^{\circ} \mathrm{C}$
Storage: $-20^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}$
Humidity:
Operating: $10 \% \mathrm{RH}$ to $90 \% \mathrm{RH}$
Storage: $5 \%$ RH to $90 \%$ RH
Dimension $145 \times 116.8 \times 25 \mathrm{~mm}$ (W x D x H)
$5.7 \times 4.6 \times 0.98$ in
EMI FCC, CE, VCCI Class A
