## IES-0883

6 GE +2 SFP Managed Switch - 20 to 60C, DIN-rail
Quick Installation Guide

## Default Setting

| IP | 192.168 .10 .1 |
| :--- | :---: |
| Login | root |
| Password | [blank] |
| Console | $115200, \mathrm{n}, \mathrm{8}, 1$ |

## Features

- Meets EN61000-6-2 \& EN61000-6-4 EMC Generic Standard Immunity for industrial environment.
- Manageable via SNMP, Web-based, Telnet, and RS-232 console port.
- Supports Command Line Interface in RS-232 console.
- Supports IEEE802.3/802.3u/802.3ab/802.3z/802.3x. Auto-negotiation: 10/100/1000Mbps, full/half-duplex. Auto MDI/MDIX.
- 1000Base-SX/LX: Multi mode or Single mode SC type; 1000Base-BX: WDM Single mode SC type.
- Support 4096 MAC addresses. Provides 1 M bits memory buffer.
- Store-and-forward mechanism.
- Full wire-speed forwarding rate
- Alarms for power failure by relay output.
- Operating voltage and Max. current consumption: 1.7A @ 12VDC, 0.85A @ 24VDC. Power consumption: 20.4W Max.
- Power supply: Redundant DC Terminal Block power inputs and 12VDC DC JACK with 100-240VAC external power supply.
- Field Wiring Terminal Markings: Use Copper Conductors Only, $60 / 75^{\circ} \mathrm{C}$, wire range 12-24 AWG, torque value 7 lb -in.
- $-20^{\circ} \mathrm{C}$ to $60^{\circ} \mathrm{C}\left(-4^{\circ} \mathrm{F}\right.$ to $\left.140^{\circ} \mathrm{F}\right)$ operating temperature range. UL508 Industrial Control Equipment certified Maximum Surrounding Air Temperature @ $60^{\circ} \mathrm{C}$ ( $140^{\circ} \mathrm{F}$ )
- For use in Pollution Degree 2 Environment.
- Supports Din-Rail or Panel Mounting installation

## Package Contents

- CD User Manual / Utility

## Overview

LevelOne IES-0883 Industry Ethernet Switch provides 8 ports of Gigabit Ethernet plus 2 1000Base SFP slots to enable high speed network at mission-critical environment. This device is designed to be mounted on an industry standard DIN-rail, plus the clearly visible status LEDs provide simple monitoring of port link activity. Moreover, the SFP slots support pluggable modules that enabling you to choose from a variety of transceivers.

## Cost Effective

This device operates under -20 to 60 Celsius ( -4 to 140 Fahrenheit) temperature that offers optimal suitability for industrial applications at low cost while maintaining all components built to withstand harsh environment applications without compromise reliability and stability

## Resilient Ring Network

Supports Ring topology network providing simple installation and ultra fast network recovery performance, less than 15 ms . Unlike much complex resilient topology, such as a redundant star, the Ring simplifies the network design and requires less cabling installation. In addition, fast network recovery time helps minimize system downtime.

## Power Input

|  | PW1 | + | 12-32VDC |
| :---: | :---: | :---: | :---: |
|  |  | - | Power Ground |
|  | PW2 | + | 12-32VDC |
|  |  | - | Power Ground |
|  | (1) | Earth Ground |  |
|  | $\xrightarrow{3}$ | Relay Output | 1A@ 24VDC |
|  | Relay Alarm warning signal disable for following: <br> 1. The relay contact closes if Power1 and Power2 are both failed but Power3 on <br> 2. The relay contact closes if Power3 is failed but Power1 and Power2 are both on |  |  |

[^0]LED Status

| LED | Status | Description |
| :--- | :--- | :--- |
| PW 1,2,3 | Steady | Power On |
|  | Off | Power Off |
| 10/100/1000Base-TX \& 1000Base-FX |  |  |
|  | Steady | Network connection established |
|  | Flashing | Transmitting or Receiving data |
|  | Amber | Green |
|  | Off | Connection at 1000Mbps speed |
| Alarm | Connection at 10Mbps speed |  |
|  | Steady | State the power redundancy failure has <br> being addressed |
|  | Off | State the power redundancy failure has <br> not being addressed |

IES-0883

Terminal Mode). And the "switch_a(config)\#" prompt will show on the screen.
12. Set new IP address and subnet mask for Switch:
13. At the "switch_a(config)\#" prompt just type in "interface vlan1.1" and press <Enter> to logon to vlan 1 (vlan 1.1 means vlan 1). And the "switch_a(config-if)\#" prompt will show on the screen.
14. Command Syntax: "ip address A.B.C.D/M". "A.B.C.D" specifies IP address. " $M$ " specifies IP subnet mask. " $M$ " $=8$ : 255.0.0.0, 16:255.255.0.0, or 24: 255.255.255.0.
15. For example, At the "switch_a(config-if)\#" prompt just type in "ip address 192.168.1.10/24" and press <Enter> to set new IP address (192.168.1.10) and new IP subnet mask (255.255.255.0) for Switch

## Console Configuration

1. Connect to the switch console:
2. Connect the DB9 straight cable to the RS-232 serial port of the device and the RS-232 serial port of the terminal or computer running the terminal emulation application. Direct access to the administration console is achieved by directly connecting a terminal or a PC equipped with a terminal-emulation program (such as HyperTerminal) to the switch console port.
3. Configuration settings of the terminal-emulation program:
4. Baud rate: 115,200 bps, Data bits: 8, Parity: none, Stop bit: 1, Flow control: none.
5. Press the "Enter" key. The Command Line Interface (CLI) screen should appear as below:
6. Logon to Exec Mode (View Mode):
7. At the "switch_a login:" prompt just type in "root" and press <Enter> to logon to Exec Mode (or View Mode). And the "switch_a>" prompt will show on the screen.

| \% 115200 - HyperTerminal | - $\square^{\text {a }}$ |
| :---: | :---: |

| $\checkmark$ | , |
|  |  |

8. Logon to Privileged Exec Mode (Enable Mode):
9. At the "switch_a>" prompt just type in "enable" and press <Enter> to logon to Privileged Exec Mode (or Enable Mode). And the "switch_a\#" prompt will show on the screen.
10. Logon to Configure Mode (Configure Terminal Mode):
11. At the "switch_a\#" prompt just type in "configure terminal" and press <Enter> to logon to Configure Mode (or Configure

## Web Configuration

1. Login the switch:
2. Specify the default IP address (192.168.1.10) of the switch in the web browser. A login window will be shown as below:

3. Enter the factory default login ID: root.
4. Enter the factory default password (no password).
5. Then click on the "Login" button to log on to the switch.

Note: Please refer to User Manual for more detailed information

[^0]:    PW3 is DC Jack type with 12VDC input
