## Overview

LeveIOne IES-1083 Industry Ethernet Switch provides 8 PoE ports of 10/100Base-TX plus 2 1000Base SFP slots Ethernet to enable high speed network at mission-critical environment. This device is designed to be mounted on an industry standard DIN-rail.

## High Reliability

All components are built to withstand harsh environment applications without compromise where humidity, temperature variation and even shock vibration are concerns, including Electric \& Utility, Critical Infrastructure, Transportation and Surveillance Security. This device operates under -40 to 75 Celsius ( -40 to 167 Fahrenheit) temperature.

## Resilient Ring Network

Supports Ring topology network providing simple installation and ultra fast network recovery performance, less than 15 ms . Unlike much complex resilient topology, such as a redundant star, the Ring simplifies the network design and requires less cabling installation. In addition, fast network recovery time helps minimize system downtime.

## Power over Ethernet

This switch is Power Sourcing Equipment (PSE), and it is fully complied with IEEE 802.3af PoE standard at maximum 15.4W power budget per port. It helps to save infrastructure wiring costs dramatically by eliminating electric wiring and less UPS needed.

## Physical Description

## Power Input

LED Status

| LED | Status | Description |  |
| :--- | :--- | :--- | :---: |
| PW 1,2,3 | Steady | Power On |  |
|  | Off | Power Off |  |
| 10/100Base-TX | Steady | Network connection established |  |
|  | Flashing | Transmitting or Receiving data |  |
| PoE | Steady | Power Device (PD) is connected |  |
|  | Off | Power Device (PD) is disconnected |  |
| 100Base-FX |  |  |  |
| LNK/ACT | Steady | Network connection established |  |
|  | Flashing | Transmitting or Receiving data |  |
| 10/100/1000Base-TX \& 1000Base-FX \& SFP |  |  |  |
| LNK/ACT | Steady | Network connection established |  |

IES-1083

Terminal Mode). And the "switch_a(config)\#" prompt will show on the screen.
12. Set new IP address and subnet mask for Switch:
13. At the "switch_a(config)\#" prompt just type in "interface vlan1.1" and press <Enter> to logon to vlan 1 (vlan1.1 means vlan 1). And the "switch_a(config-if)\#" prompt will show on the screen.
14. Command Syntax: "ip address A.B.C.D/M". "A.B.C.D" specifies IP address. " $M$ " specifies IP subnet mask. " $M$ " $=8: 255.0 .0 .0$, 16:255.255.0.0, or 24: 255.255.255.0.
15. For example, At the "switch_a(config-if)\#" prompt just type in "ip address 192.168.1.10/24" and press <Enter> to set new IP address (192.168.1.10) and new IP subnet mask (255.255.255.0) for Switch

## Console Configuration

1. Connect to the switch console:
2. Connect the DB9 straight cable to the RS-232 serial port of the device and the RS-232 serial port of the terminal or computer running the terminal emulation application. Direct access to the administration console is achieved by directly connecting a terminal or a PC equipped with a terminal-emulation program (such as HyperTerminal) to the switch console port.
3. Configuration settings of the terminal-emulation program:
4. Baud rate: $115,200 b p s$, Data bits: 8, Parity: none, Stop bit: 1, Flow control: none.
5. Press the "Enter" key. The Command Line Interface (CLI) screen should appear as below:
6. Logon to Exec Mode (View Mode):
7. At the "switch_a login:" prompt just type in "root" and press <Enter> to logon to Exec Mode (or View Mode). And the "switch_a>" prompt will show on the screen.

8. Logon to Privileged Exec Mode (Enable Mode):
9. At the "switch_a>" prompt just type in "enable" and press <Enter> to logon to Privileged Exec Mode (or Enable Mode). And the "switch_a\#" prompt will show on the screen.
10. Logon to Configure Mode (Configure Terminal Mode):
11. At the "switch_a\#" prompt just type in "configure terminal" and press <Enter> to logon to Configure Mode (or Configure

## Web Configuration

1. Login the switch:
2. Specify the default IP address (192.168.1.10) of the switch in the web browser. A login window will be shown as below:

3. Enter the factory default login ID: root.
4. Enter the factory default password (no password).
5. Then click on the "Login" button to log on to the switch.
